

# ADESSO APP-IN-A-DAY WORKSHOP

Theory and practice of the Microsoft Power Platform

## Workshop overview

- ▶ Location of the event:  
Virtual via Microsoft Teams
- ▶ Duration of the event:  
8 hours
- ▶ Target group:  
CIO, IT manager, specialist department, business analyst

## Agenda

- ▶ Presentation of the Low-Code Application Platforms and the Power Platform
- ▶ Insight of the database model: The Common Data Service
- ▶ Application development with Power Apps
- ▶ Process automation with Power Automate

## Learn about the Microsoft Power Platform: Develop an application in just one day

Modern low-code application platforms are in vogue because they increase digital productivity in the company without having to rely on complicated developments. The Microsoft Power Platform is the market leader and the ideal basis for more flexibility and agility. The focus is on cost savings, efficiency gains and security for critical business processes. The Power Platform can support core business processes through application development, process automation, business analytics and the use of intelligent virtual agents.

Power BI

Power Apps

Power Automate

Power Virtual Agents

Developing applications in just one day sounds impossible? The App-in-a-Day Workshop by adesso enables business and technical decision-makers to develop their own app under professional guidance and to get to know the potentials of the Power Platform. Take the chance and experience how you can react faster and more efficiently to your company's requirements in the future with customized, mobile business applications.

## Let's develop new opportunities together!

We would like to invite you to the interactive App-in-a-Day workshop and create an application with the Power Platform together, with the aim to get to know the basic features and to take the first steps with low code approaches.
