

# Azure Platform Readiness & Maturity Assessment

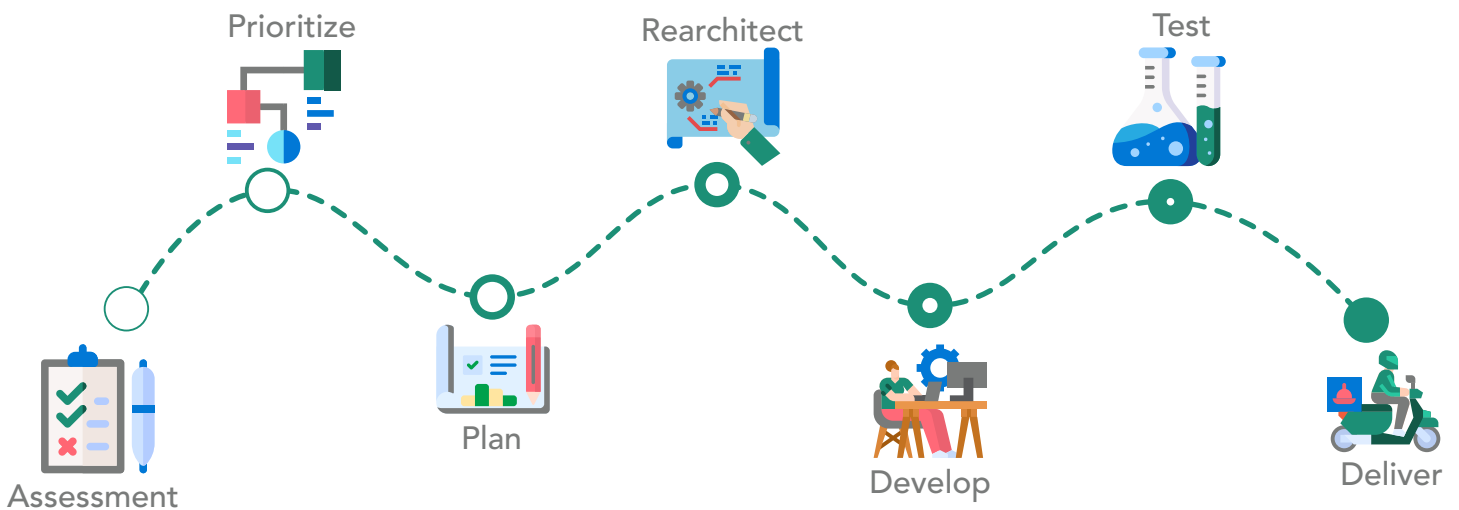

With Application Modernization, we aim to improve agility, time to market, reduce costs and simplify the application maintenance so customers can focus on the business over the system maintenance overheads in today's digitally transformed business era. Gone are the days we maintained on-premise applications, or used virtualization. We today have Cloud-Nativity, where we leverage fully managed services provided by Azure where everything can be provisioned with just few clicks, that too in very short time.

**AdFolks'** Azure Platform Readiness and Maturity Assessment (APRMA) programme is about assisting customer teams to modernize their applications by helping with a comprehensive application modernization assessment and detailed readiness report.

## At the end of the workshop, you will be able to:

- Gain confidence in modernizing the platform and applications
- A detailed Assessment Report
- Fully exploits cloud principles of flexibility, scalability and cost effectiveness
- Understand how the Risks associated with the business and Cost will be Reduced.
- Cost effective architecture to assist with cloud migration
- Achieving sustainability, efficiency, and business value
- Higher digital maturity
- Gain actionable insights from stakeholder interaction with modernized applications
- Prepare and enable the business to transform
- Shift from maintaining apps to implementing innovative solutions and differentiation.

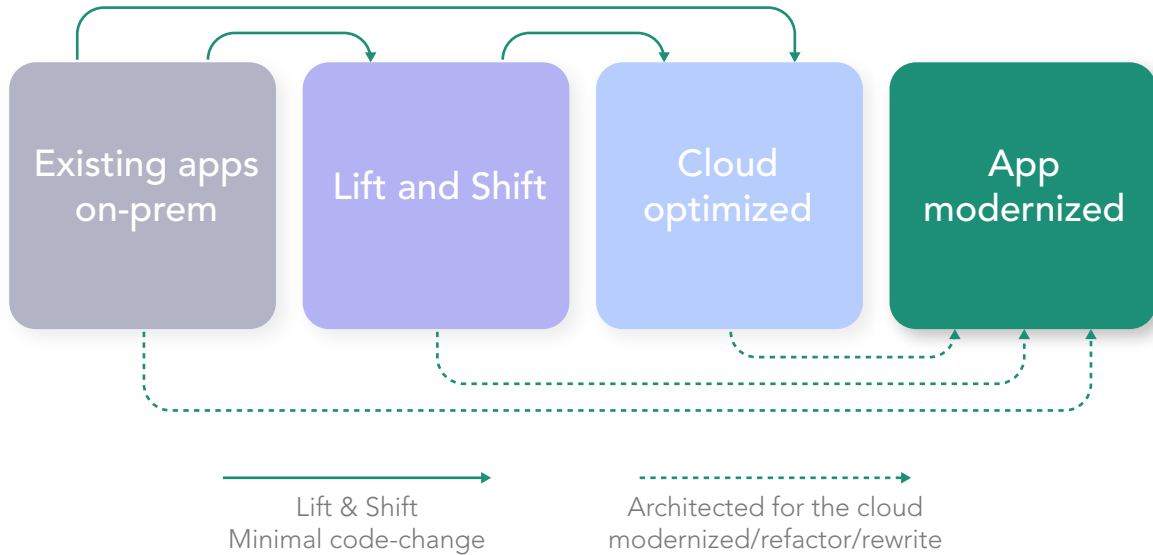

We enlighten your applications next-generation ready, there by exploiting the benefits of:

Digital Transformation  
Fast-to-Market  
Cost Reduction and Optimization  
Agility and Portability  
Easy Application Upgrades  
Operational Efficiency

Improved Security  
Cloud Readiness  
Customer Satisfaction  
Realtime Insights  
Reducing Dependencies  
Governance and Compliance

# Cloud Maturity Model

In addition to the **assessment and reports**, this programme will give you an overview of:

- Application Modernization Concepts
- Performing Cloud Readiness Assessments
- Re-architecting and Re-engineering
- Architecture Patterns
- Future Proofing the Platforms
- Modernize the Databases
- Enforcing DevOps/DevSecOps culture
- Real Time Analytics Capabilities
- Backup and Disaster Recovery

## We're excited to support you in your Digital Transformation Journey.
