

Do your Frontline Workers have the ability to log and track incidents with ease?

Workplace Health and Safety is a priority issue for most businesses, especially those with a significant Frontline Workforce.

Reporting and keeping track of Workplace Incidents can be hard, that's why we have built 'VisualSafe' a Microsoft Teams based application that provides your employees with the ability to do this with the tools at their fingertips.

VISUALSAFE FOR TEAMS

Guided by an Adopt & Embrace Adoption Consultant, customise and embed VisualSafe for Teams into your business.

VisualSafe will ensure your workers can log an incident, including uploading a photo, provide additional details and then track its progress throughout the incident lifecycle. It will ensure all your workers have access to the incident information as well as Safety Library details at any time they need.

Adopt & Embrace.

1

UNDERSTAND THE APP

Understand how the application works

2

CUSTOMISATION

We will work with you to make minor changes such as branding to the app

3

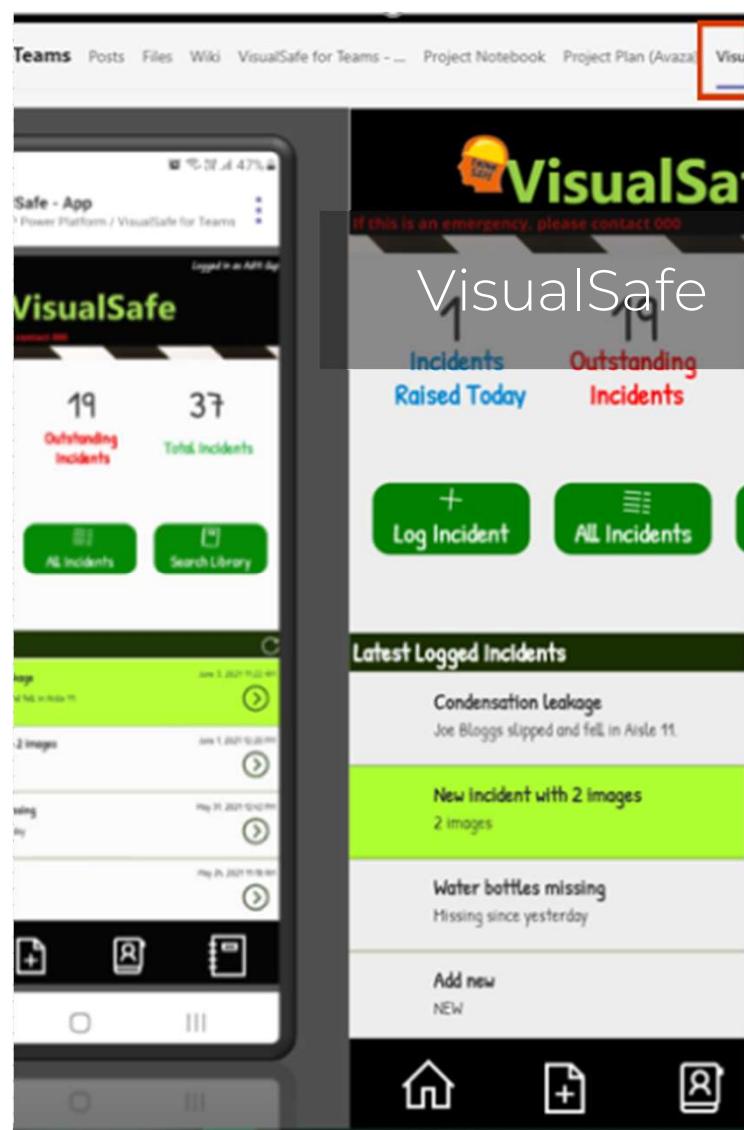

DEPLOY

Deploy the app into your environment

4

USE

Your workforce can commence utilising the app

AUD \$24,990 ex GST
Including up to 3 days of consulting services to assist with customising and deploying VisualSafe.
