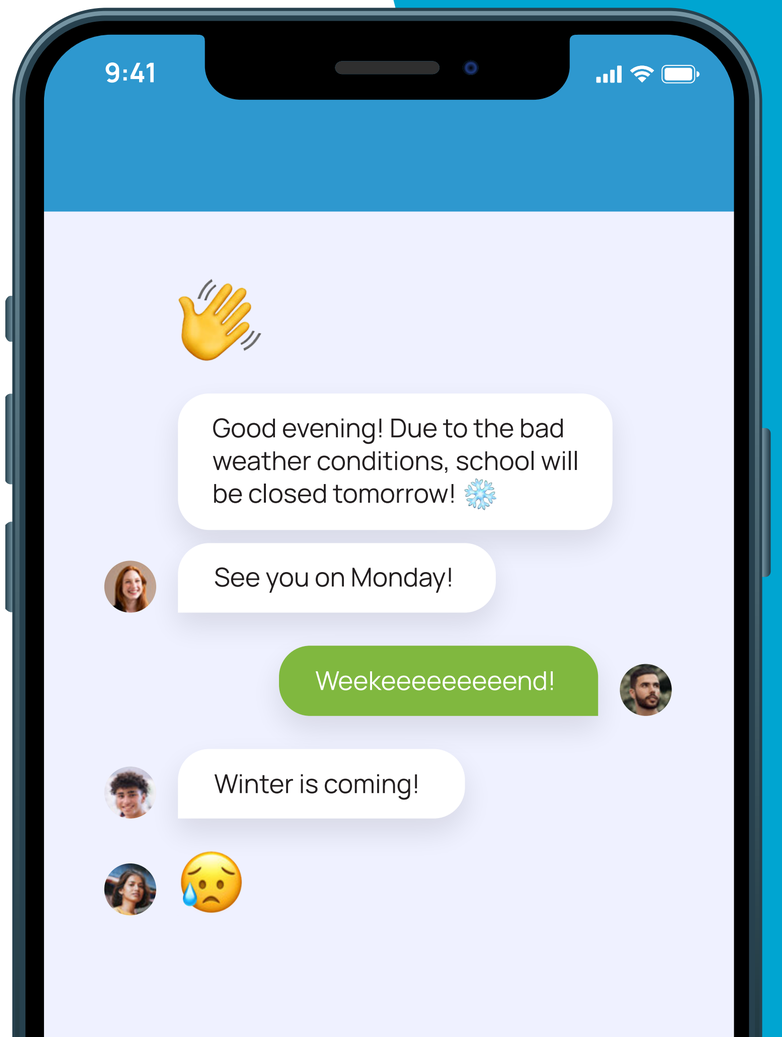
- **User friendly, intuitive interface**



Manage fees and services

Configuration of school services

The school configures all services offered to children and parents, such as tuition, meal fees, supplies, pencils, uniforms, clubs, piano lessons, ballet, excursions and others.

Set the validity of services and recurring payments

The school automatically sets the validity of services and generates invoices (daily, weekly, monthly, quarterly, annually, customizable).

Create and send invoices with online payments

Parents can view all services configured by schools and make payments through the platform, via cash, card or bank transfer.

Custom notifications

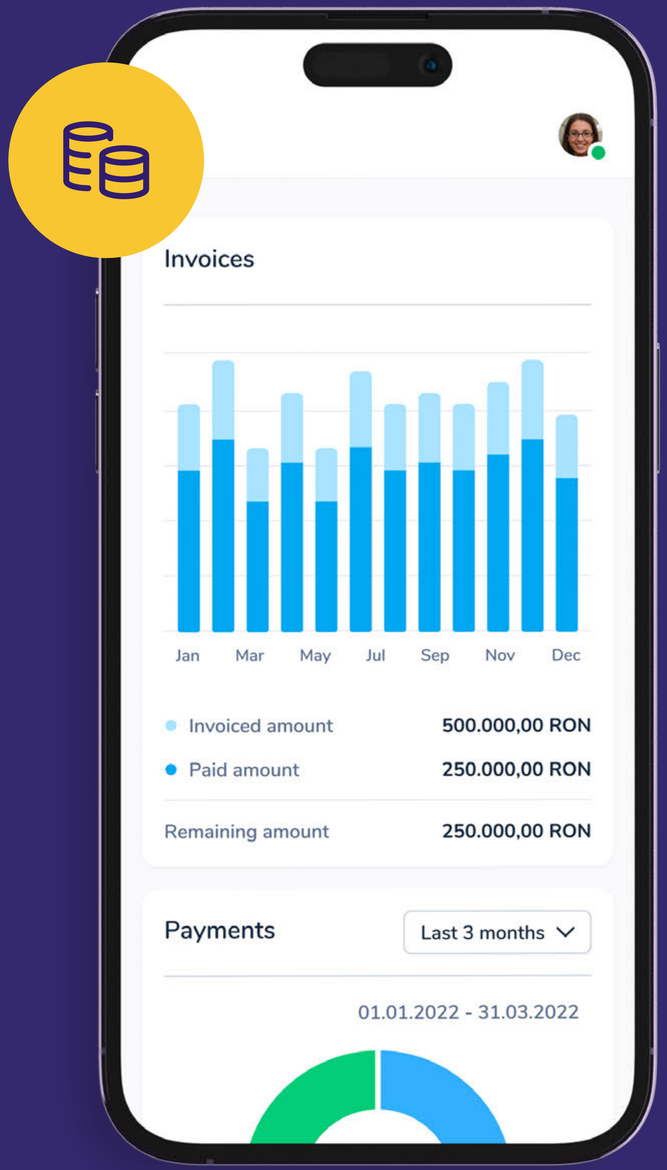
Parents receive push notifications on their phones and emails for payment reminders.

Export invoices in all formats

The schools' accountant downloads the invoices from the platform in any desired electronic format and uploads them into the accounting application used by the school.

Tax reports

The principal and secretary generate reports on the financial / accounting activities of the school, such as the amount billed for each service, the amount paid by parents and remaining amounts.



Dedicated accounts

School managers are more agile

- get a dashboard of all teachers and students activities
- analyse data and generate reports
- make data-based decisions
- build an innovation - based image in the community
- create billing profiles and manage invoices & payments ⭐

Teachers focus on their mission

- class management (class & individual report, assessment, homework & projects, differentiated tasks)
- communication with students, parents, teachers (1:1 or 1:many)
- video meetings
- personal portfolio
- resources

Students have a better learning experience

- learn on their own way; more digital, more flexible
- can see a dashboard with their results
- get personalised tasks
- collaborate easier on several projects (at school or after-school)
- set up data-based learning goals

Parents become more engaged

- get instant notifications (grades, absences, teacher remarks, news)
- prevent poor results
- direct communication with the school
- increased presence at parents meetings (online)
- make payments and request services ⭐

Public authorities increase local innovation

- dashboard with the necessary data on schools they are responsible with
- get real-time information
- communicate with all schools (incl. video meetings)
- take data-based decisions

adservio®

Data Security

Locally hosted in Azure cloud data centers

Security tested by KPMG

Daily backup

2-factor authentication

Requires two separate, distinct forms of identification in order to access something.

Internal Security

Only certain members of our team have access to users data; they are constantly trained and have signed a confidentiality agreement

Latest security patches

During the night / low traffic moments

We use the newest security policies and software

99.9% Uptime

Based on 15 years of service
