Gener8

Productionised GenAI Platform on Azure – Scalable, Secure AI Solutions for Your Business

Gener8: Productionised GenAI Platform on Azure – Scalable, Secure AI Solutions for Your Business

Key Features:

GPT-Powered Chatbot: Automate customer support and interactions with an intelligent, conversational AI powered by Azure.

Document Summarisation: Efficiently process and summarise large volumes of content, saving time and resources.

Document Q&A: Extract accurate answers from your documents in real time, improving decision-making and operational efficiency.

Platform Benefits:

Built on Microsoft Azure: Leverage Azure's world-class infrastructure for enterprise-grade security, reliability, and compliance with industry regulations.

Scalability & Flexibility: Our platform scales effortlessly with your business, offering complete customisation to meet your specific requirements.

Cost Transparency: With an itemised cost analysis dashboard, you can easily monitor and control your spending, ensuring there are no hidden fees.

Seamless Integration: Quickly integrate with your existing systems to ensure a smooth transition without business disruption.

Quick Deployment: Fast-track your AI journey with a fully productionised solution deployed in as little as four weeks.

Why choose us?

Our GenAI platform is designed to take advantage of Azure's full capabilities, ensuring that your AI solutions are secure, scalable, and compliant with the latest industry standards. With quick deployment, transparent pricing, and advanced AI capabilities, our platform is the perfect fit for businesses looking to accelerate their AI adoption.

About Advancing Analytics

Advancing Analytics is a highly regarded provider of analytics solutions, acknowledged for their expertise in this field. They have been designated as an Advanced Analytics Partner for Microsoft and have won multiple awards as a Databricks partner. Regardless of the type of engagement, Advancing Analytics ensures that you implement an architecture that is aligned with best-practices and with the future direction of the chosen platform.

We are not your run of the mill consultancy, we build rich, robust sets of frameworks and accelerators to reduce the development footprint you need to achieve your goals. We are seasoned experts that can give you an initial boost, help you establish your internal capability and get everyone working smarter. We want to make your teams as good as we are.

Why do we claim this? It is because we:

- Have delivered the world's most sophisticated analytics projects.
- Hold seven current Microsoft Most Valuable Professional awardees, Microsoft's most prestigious award.
- Are known in the industry for thought-leadership (2 million views on YouTube, 2 popular Data & AI podcasts, hundreds of blogs) and bleeding-edge delivery.
- Microsoft Partner Specialisms in Analytics & AI on the Azure cloud platform.
- Worked across all verticals and can bring that cross-industry knowledge to bear on your problems.
- Have a highly skilled network of industry thought leaders as affiliates, across the globe.
- Work directly with the Microsoft engineering teams, to bring you long-term insight.
- Microsoft Solution Partner for Data + AI and Digital App Innovation.

Basically, we love what we do!
