Give your business the edge with industry-leading LLMOps

Large Language Models (LLMs) have huge potential to change how your business uses its data, but they can be hard to get right. Our Large Language Model Ops (LLMOps) solution can elevate your operations with a sophisticated and cost-effective approach.

What is LLMOps?

An LLMOps platform automates the operation, synchronisation and monitoring of machine learning. It provides data scientists and software engineers with a collaborative environment that enables iterative data exploration, real-time coworking capabilities for experiment tracking and prompt engineering.

Benefits of the Advancing Analytics LLMOps solution

Our tried and tested approach supports your model and addresses key challenges with automated fine-tuning, cost optimisation, domain-specific guardrails and hallucination mitigation.

We deliver real-time responses that can be packaged and served as API endpoints, ready to empower your operations wherever you choose.

Built in Azure, our solution effortlessly integrates with your existing architecture, ensuring a seamless transition.

The built-in guardrails ensure your large language model performs at enterprise-level quality.

Our solution is a collection of tools and processes, developed with your team, to deliver the perfect customised solution for your business.

Don't just take our word for it

A leading company in the online education industry collaborated with Advancing Analytics to integrate GenAI into their digital learning platforms.

Working with Advancing Analytics GenAI consultants was a game-changer for our organisation.

Head of Curriculum Development,
An Online Education Leader

Why follow when you can lead?

Only 14% of companies have LLMs in production. Be one of the most innovative companies in the world and reach new linguistic heights with our LLMOps solution.

Are you using LLMs at your organisation today?

44%

Yes, but only for experimentation purposes

27%

No, but we plan to start using LLMS in the next 12 months

13%

Yes, we have more than 2 in production

1%

Yes, we have 1-2 LLMS in production

15%

No, and no immediate plans to use LLMS

Why Advancing Analytics?

We're a multi-award-winning Databricks partner with a customer-centric approach. We have over 50 Lakehouse-certified developers, seven Databricks Champions and one Databricks Beacon. We're a Microsoft Solutions Partner in Data & AI and Azure, with an Advanced Specialisation in Analytics, and we have 7 MVPs within the company. We're also actively investing in data partnerships with Google, AWS and dataiku.
