

Hospitals and Clinics Bed Management

Solution desc

App Description

The Microsoft Teams Health Care Bed Management App allows the health care provider employees to easily update their available beds in their different departments and units, also it enables hospital administrators and selected employees to view all the Available vs. Occupied beds for any selected date. The solution is Mobile friendly and can be fully used on Mobile devices and tablets. The solution leverages all the great features of Teams, Nurses can now chat or have a call directly in the same application while updating the available beds or checking their dashboard and this eliminates the need of exchanging emails

Facility: Facility One | Date: 27 January 2020 06:52

Specialty	Total Operational Beds	Open Beds Staffed	Capacity (Bed Available)				Total Capacity Available	Beds Position at time
