

## Azure Virtual Desktop

Modern remote work experience in the cloud

Access the ability to work remotely from anywhere on almost any device in a modern, secure and managed service from Advania.

Working remotely is a new standard, with Advania managed Azure Virtual Desktop you will rapidly get access to a modern way of working platform that integrates with your current infrastructure, reduces license cost and increases security. Advania brings knowledge and stability from over 20 years as a service provider and will give you a managed modern way of working client platform.

### Why use Managed Azure Virtual Desktop service from Advania?

- Remote access to data and application can be a complex, expensive and extensive platform to manage
- A certified Microsoft AMP-partner with over 20 years experience from workplace projects
- Utilize cloud services in an optimal way that aligns with the hybrid business, your organization and suit today's modern way of working

### Experience

- Access your application and desktop anywhere from almost any device
- Azure Virtual Desktop delivers familiar experience via Windows 10 multi session OS and integrations

### Secure

- Sensitive data and information is stored within company boundaries and processed in Azure instead of local PC
- Use already implemented security functions like multi factor authentication and information protection to keep company information secure

### Cost

- Utilize already investments in Microsoft 365 licensing to achieve more with Azure Virtual Desktop
- Reduce infrastructure cost by optimizing platform performance with flexible cloud platform
