Azure AD Assessment is a packaged solution that helps customers quickly evaluate Azure AD configuration with security in focus

Challenges

- Identity management with Active Directory is one of the most central and critical functions of an IT infrastructure, it is important to ensure security and adherence to recommended practices
- Improve Identity and Access Management Posture

Ideal Solution

- Our acknowledged experts help you to identify and assess your Azure AD environment to quickly provide insights and recommendations.
- Azure AD environment that complies with security regulation and technical solutions
- Data is collected in a workshop-style meeting and analyzed to identify deviations from Microsoft's recommendations.

Desired Outcomes

- Identify lack of recommended practices for a well-managed and secure Azure AD environment
- The final reports have comments and recommendations tailored to your specific environment.
- The remediation activities are planned together based on your priorities.

Assessment walk-through

Goals of the assessment

- Provide Insights from your own data
- Improve Identity and Access Management Posture

Two-way discussion

- Findings are based on lessons learned / real world experience across large enterprise customers
- We want to learn if/how recommendations fit in your environment and requirements

Identity and Access Management Areas

Identity Management

- Identity Lifecycle (Joiners/Movers/Leavers)
- Entitlement Management

Access Management

- Credential Management
- Authentication
- Single Sign On
- Application Access Policies
- Device Management
- Usage Analytics

Governance

- Attestation
- Auditing
- Privileged Accounts

Operations

- Service and Infrastructure Health
- Supportability

How does it work?

Delivery Stages

- Phase 1: Gather information – workshop and interview with customer
- Phase 2: Analyzing findings from Phase 1 and validating results with Microsoft
- Phase 3: Present findings to customer
- Phase 3: Plan remediation in cooperation with customer

Closing comments

” We are honored and proud at Advania to be the first Microsoft partner globally to offer our customers an Azure AD Assessment, in cooperation with Microsoft Corp.

The result of this assessment gives high value to our customers and we have already received great feedback. Our customers value the opportunity to quickly get up to speed with current best practices and understand new opportunities. They can immediately start executing on a prioritized plan and feel safe that they are taking the right actions to achieve a solid platform.”

Tobias Öien – Business Unit Director Advania
