

PROVIDER ENGAGEMENT

Delivering improvements
in Risk Adjustment
& Star Ratings

Integrates with all major electronic
medical record systems

Support Your Provider Base

TOGETHER YOU CAN IMPROVE CLINICAL DOCUMENTATION AND HEALTH OUTCOMES.

Health Plans enjoy improved risk score accuracy, Star, and quality measures when their provider base participates in proactively closing care gaps and maintaining compliant record documentation. The key to success is a provider-centric platform.

Advantasure's Provider Engagement Program enables provider's with the right system for their practice—whether that's on-site service or EMR integrated technology.

EMR-Integrated Technology Streamlines The Documentation Process...

...with the technology needed for timely coding reviews and clinical documentation improvement (CDI) alerts—all within their existing electronic medical record (EMR) system.

ELECTRONIC DELIVERY

Powered by our AHIMA and AAPC certified coders, the Advantasure solution seamlessly integrates with the provider's already existing EMR to deliver electronic CDI alerts at the point of care—simplifying workflows and reducing the time to close gaps in documentation.

ON-SITE SERVICE

The on-site Provider Engagement Program is implemented via our team of physician reviewers and certified coders to review medical records and identify documentation opportunities and clinical alerts. We offer opportunities for peer-to-peer collaboration and education so your providers are up to speed on medical record documentation requirements.

When Health Plans & Providers Partner, Everyone Wins

HEALTH PLANS

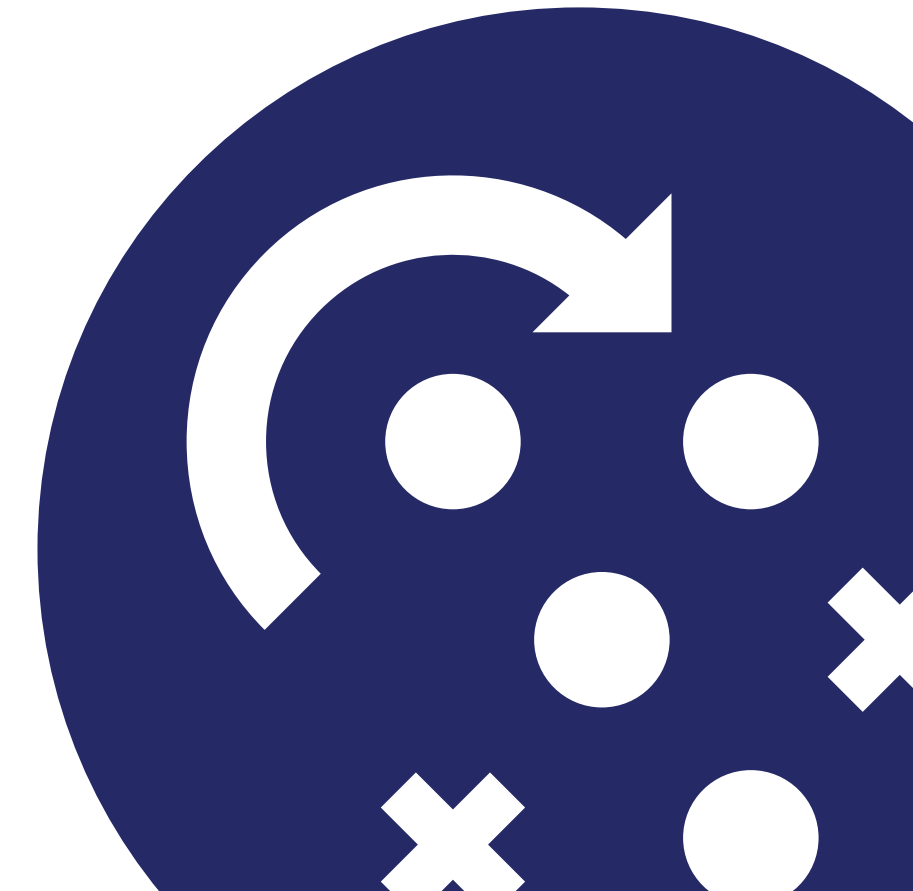

- Improved risk score accuracy
- Unique tool that integrates with all major EMR systems
- Improved medical record documentation
- Reduced RADV exposure
- Quick implementation
- Improved Star ratings

PROVIDERS

- Provider-centric model with integrated EMR capabilities
- Provider education
- Experienced team to work within practice workflows
- Improved medical record documentation
- Improved quality scores

MEMBERS

- Chronic condition identification and ongoing care
- Accurate and compliant medical record documentation
- Support of provider/member relationship
- Improved quality of care
- Improved member health

Build Your Bond with Providers – and Members

We speak the language of your providers, seamlessly integrating with workflows. The PEC program works with clinicians and their office staff to help ensure accurate, complete and compliant documentation in ways that work for them. Electronic CDI alerts at the point of care integrate with the practices' existing EMR system, simplifying workflows and reducing the time needed to close gaps in documentation. Our certified, experienced coders and staff work with providers to educate and support efforts for improvement.

Your members can stay healthier as the provider anticipates and manages potential new conditions. CDI alerts flag providers to document previously reported conditions that require monitoring – even when members don't report concerns.

ADD STAR QUALITY FOR YOUR PLAN AND PROVIDERS

PEC results don't stop with better risk adjustment and provider-friendly technology. Improving documentation and monitoring of member conditions helps drive improvement in key metrics for Star Ratings. We coordinate the activities related to risk adjusted revenue and Star measure that can be impacted during a patient visit.

A comprehensive CDI program

PEC results don't stop with better risk adjustment and provider-friendly technology. Improving documentation and monitoring of member conditions helps drive improvement in key metrics for Star Ratings. We coordinate the activities related to risk adjusted revenue and Star measure that can be impacted during a patient visit.

- Pre-populated alerts prior to member visit.
- Query process – working with providers to amend medical record within 30 days when proper documentation does not exist.
- Alerts based on physician and coder medical record reviews, plus prior diagnosis data.
- Documentation of patient's clinical status by AHIMA and AAPC-certified coders.
- Accuracy rate greater than 95%, as verified by an independent audit.
- Includes Hierarchical Condition Category (HCC) information to encourage review of prior chronic conditions.
- Coder team notes areas in need of assessment, evaluation or screening to capture the full spectrum of chronic health risk and HEDIS measures.
- Identifies quality measure gap-closure opportunities.

Open For All Types of Practices

Electronic Provider Engagement delivers alerts electronically for practices with EMR systems. Our team helps optimize performance with education, reporting and analytics.

Onsite PEC works for practices without EMR systems or that need PEC staff and processing onsite.

Remote PEC allows services for practices where onsite services aren't possible and EMR systems are limited.

IMPROVED REVENUE INTEGRITY AND LOWER COSTS WITH ADVANTASURE TECHNOLOGY

Our end-to-end risk adjustment and quality programs bring together every piece of the puzzle from seamless strategies that improve revenue integrity—optimizing operational efficiency, compliance and earned reimbursement—to technology that lower administrative costs. These solutions are provider-centric, technology forward and quickly implemented. With a client-first commitment, Advantasure has established a track record of delivering value and quality.

Advantasure is a leader in the healthcare industry, offering proven solutions to health plans and providers that deliver improved risk score accuracy, reduced RADV audit risk and increased Star ratings. Whether you are new to Medicare Advantage and the government health plan space, or simply want to improve upon your current success, we collaborate with you to provide technology-enabled services that help achieve your goals.
