# Provider Engagement Program

---

Advantasure's Provider Engagement Program has a demonstrated history of improving risk and quality scores for health plans who enable their providers with technology-driven workflows to maintain compliant records, close care gaps, and provide best-in-class member care. The key to success is a provider-centric platform and the goal is to close more prospective gaps.

Taking a data-driven approach to the benefits of the Provider Engagement Program, Advantasure presents its research and analysis of the aggregate program data.

# Timely Reviews & Fewer Queries

---

In a study examining 18-months of aggregated Provider Engagement Program data, Advantasure reviewer and coder teams evaluated the response cycle times of CDI alerts and queries for paper-based versus electronic delivery systems.

The study revealed that on average, electronic CDI alert cycle time was 15 days faster and the query cycle was 27 days faster than the paper-based alternative.

The reduced alert and query cycle time of the electronic platform can be attributed to the efficiency of the EMR-integrated provider workflows and speed of information exchange between providers, reviewer and coder teams.

# CDI Alert Response

---

CDI Alerts are quick and easy to respond to. As a result, over 75% of CDI Alerts were completed and returned with an average of 75% conditions addressed.

# Stars Rating Improve

---

Star Ratings improved an average of 5% due to identification of care gaps and supporting initiatives.

# Risk Adjustment Factor Improvement

More complete coding specificity directly impacts the risk adjustment factor. Advantasure's Provider Engagement Program participants experience an average lift of 10-15% on risk scores.

Minimal conditions coded Low level of specificity		Some conditions coded Moderate level of specificity		All conditions coded appropriately High level of specificity	
76-year-old female	0.452	76-year-old female	0.452	76-year-old female	0.452
No diabetes coded	X	Diabetes w/o complications E11.9 (HCC19)	0.106	Diabetes w/vascular complications E11.51 (HCC18)	0.307
No vascular disease coded	X	Vascular disease w/o complications I73.9 (HCC108)	0.305	Vascular disease w/ complications (left foot ulcer) I70.245 (HCC106)	1.537
CHF not coded	X	CHF not coded	X	CHF I50.9 (HCC85)	0.310
No disease interaction	X	No disease interaction	X	Disease interaction (DM + CHF)	0.152
<b>Total RAF</b>	<b>0.452</b>	<b>Total RAF</b>	<b>0.863</b>	<b>Total RAF</b>	<b>2.758</b>

# HCC Value Improved

---

More accurate member risk adjustment identification minimizes lost or missed opportunities and maximizes the effectiveness initiatives resulting in an average HCC value of \$3000 per year.

# Are You Ready to Improve Outcomes & Gain Insights With Analytics?

---

Drive results for your organization with Advantasure's Provider Engagement Program

## **IMPROVE OUTCOMES**

Make it easy for your providers so together you can raise the standard of care and improve HEDIS measures, Star ratings, risk score accuracy, and reduce RADV risk.

## **MAINTAIN COMPLIANT RECORDS**

CDI alerts are built into the provider's existing EMR workflow to ensure all member conditions are accurately and completely documented while closing quality gaps at the point of care.

## **GAIN INSIGHTS WITH ANALYTICS**

Monitor key metrics at the practice, provider organization, or health plan level for performance review, identification of long-term trends, and ad-hoc analysis.

Contact us and let's talk about how your organization can benefit from electronic Provider Engagement.
