

# Advantco Azure Adapter for Oracle Cloud Integration

# ADVANTCO

The Advantco Azure Adapter integrates Oracle Cloud Integration with Microsoft Azure across business environments to provide a seamlessly quick implementation effort.

## Benefits of the Advantco Azure Adapter:

### Low Maintenance

The Azure adapter is fully maintained by Advantco for all changes on Azure and OCI

### Quick and Easy Installation

Out-Of-The-Box integration across Oracle and Azure business environments

### Saves Time and Money

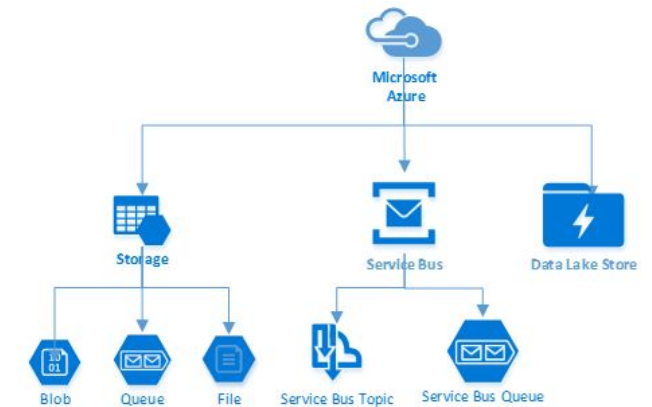

Developing your own integration solutions is costly, time-consuming and inefficient

## Key Features:

- Easy connections via specific container using AZURE credential (Connection String or Define Explicit)
- Content conversion between Plain, JSON and XML Formats
- Duplicate Handling to prevent adapter from processing same resource entities again
- Adapter-Specific Message Attributes (ASMAs) configuration for creating dynamic configurations in PI message header
- Retry Failed Block Operation to handle failed block during upload to Microsoft Azure

## Full integration with Oracle Cloud and the following services:

- Blob Storage
- Queue Storage
- File Storage
- Service Bus Queue
- Service Bus Topic
- Data Lake Store

## Use Cases

### Integrating Azure Messaging via Service Bus

- Leader in online retail used Advantco Azure Adapter with Azure Service Bus to push changes to Azure Cloud
- Broadcasting Corporation used Advantco Azure Adapter to integrate with Azure Cloud environments to support compatibility with Apache Karaf Runtime and connectivity with Azure Service Bus Topic
