

AffableBPM is an AI-powered SaaS Solution that streamlines contracts, boosts transparency, reduces risks, and maximizes ROI.

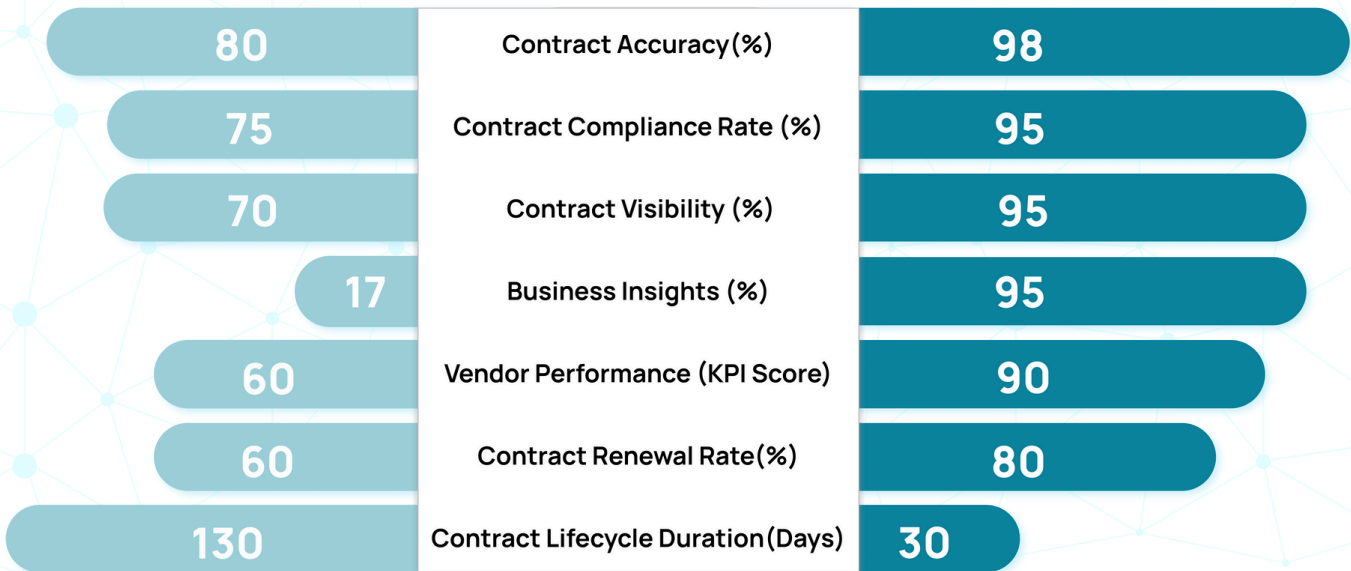

BEFORE

Manual error-prone, time taking, distributed process resulting in scattered data

VS

AFTER

Automated error-free, efficient, centralized & secure data and seamless, transparent process

“ Vendor approval process contracts now takes 30 - 40 days compared to manual process which took 140-160 days . Timely notifications helped not miss the deadlines for contracts / compliances which could have created penalties for more than \$ 500 K+ in fines”
