

FASTER CONTRACTS. SMARTER GOVERNANCE

AI-assisted first-draft generation in AffableFLOW streamlining every agreement with complete control and oversight.

Accelerate Contracts with AI Precision

AffableFLOW's Contract Drafting Copilot embeds AI directly into your workflow accelerating first-draft generation while ensuring full governance and human oversight. It supports a wide range of agreements, including NDAs, MSAs, SOWs, vendor contracts, amendments, and renewals fully configurable to your needs. Every draft is built using approved templates, clause libraries, and intake data, ensuring accuracy, compliance, and consistency. With versioning, audit trails, role-based access, and mandatory human review, AffableFLOW combines speed with control delivering faster turnaround and a seamless contract lifecycle.

Contract Drafting

Copilot Powered By AffableONE

DRAFT CREATION

APPROVALS & FINAL

Why To Choose Contract Drafting Copilot?

Accelerate Turnaround Without Compromising Control

Generate first drafts in minutes while maintaining full governance and human oversight.

Built for Compliance from the Start

Every draft is created using approved templates, clause libraries, and playbooks—ensuring no off-policy language.

Consistency Across Every Agreement

Standardize NDAs, MSAs, SOWs, vendor contracts, and more with configurable, organization-specific rules.

End-to-End Visibility & Traceability

Track every change with versioning, audit trails, and role-based access controls.

Human-in-the-Loop Assurance

Mandatory review ensures experts stay in control before execution.

Seamless Contract Lifecycle

From intake to drafting, redlining, and final approval—everything in one unified workflow.
