

afi.ai Afi SaaS Backup for Microsoft Azure

Afi SaaS Backup for Azure delivers robust and comprehensive offsite protection for Azure virtual machines (VMs) and Azure SQL databases, safeguarding configuration and data.

Comprehensive Backup and Recovery

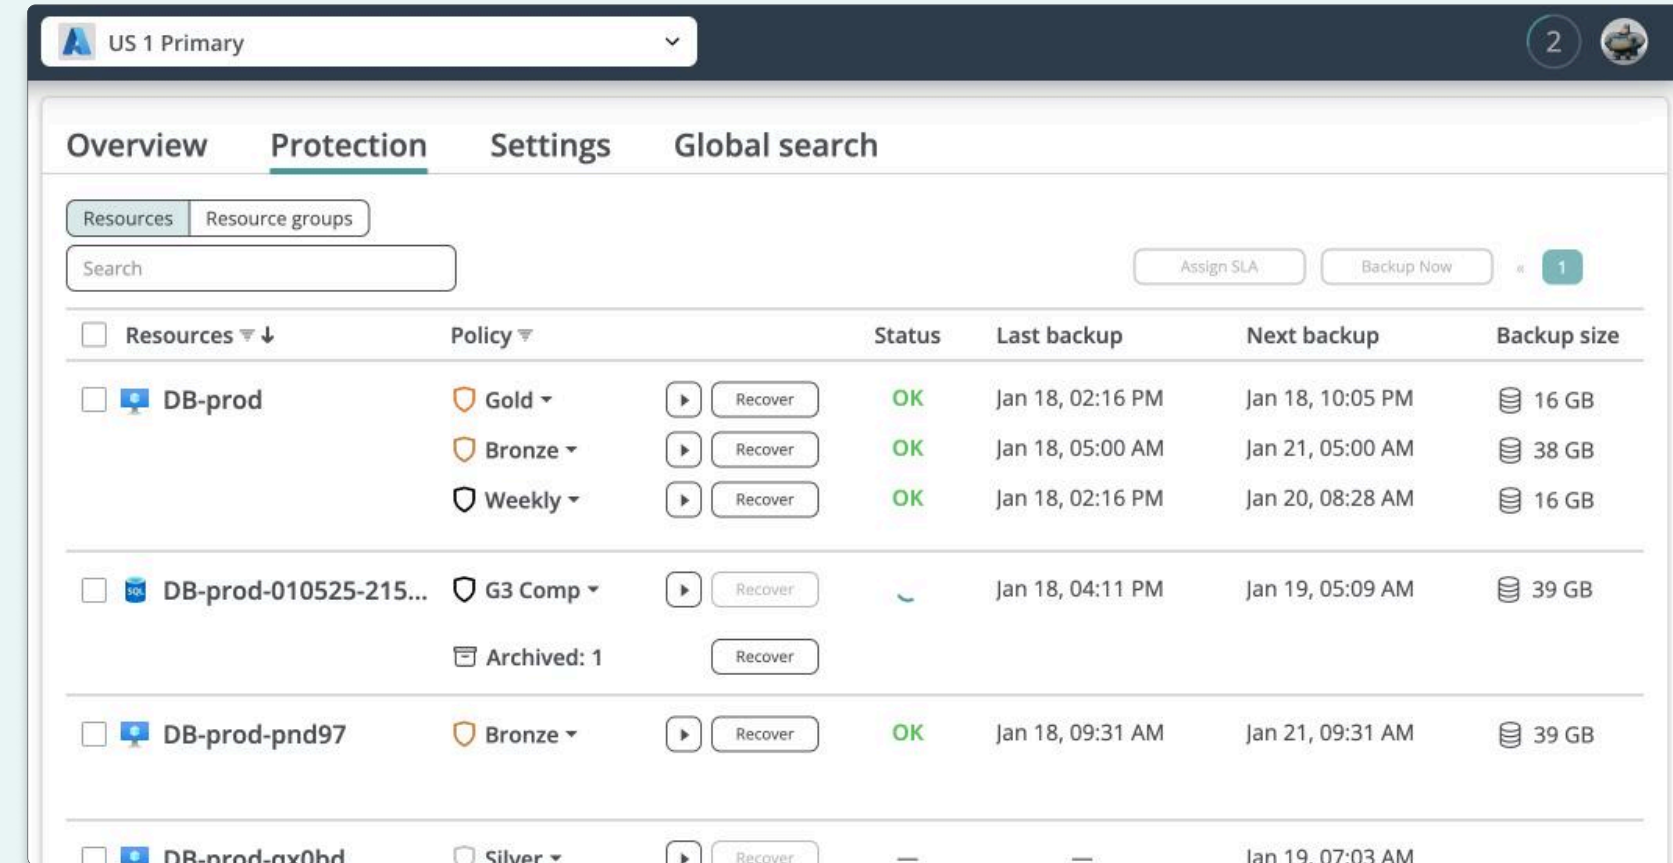

- Automatic VM and DB discovery across accounts, subscriptions, and resource groups
- Protects configurations, disk data, and DB data
- Performs crash-consistent and application-consistent backup

Advanced Recovery Management

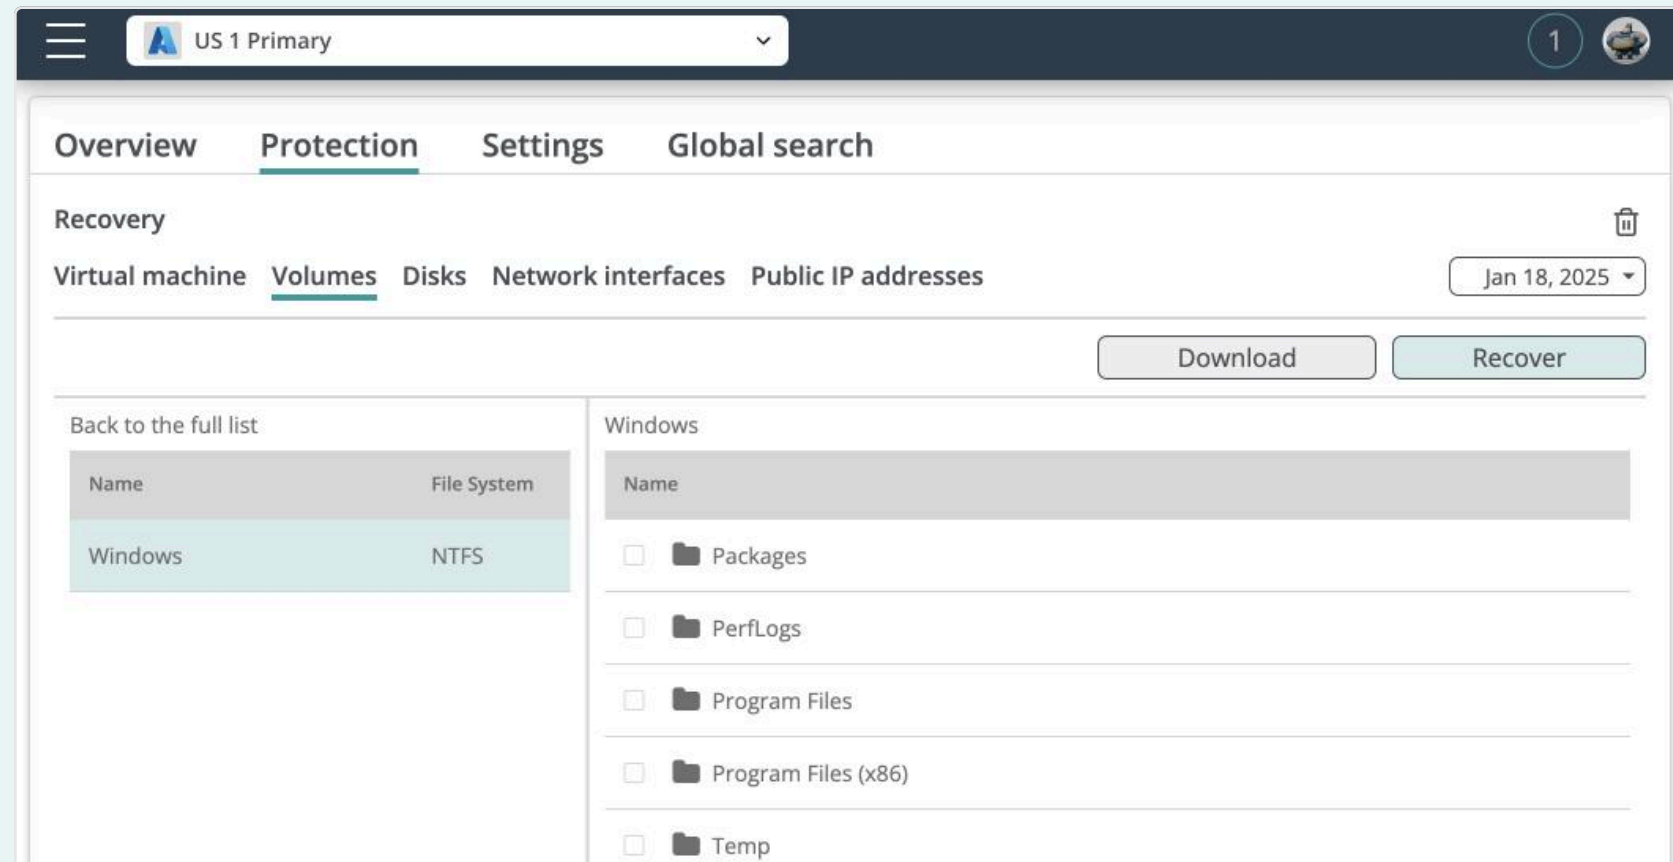

- Volume content **browsing** and **file-level** access to data
- View detailed VM configuration, including disks, network interfaces, and public IPs
- Download VM configurations in JSON format for Azure-native use

Enhanced Backup management

- Change history and labeling for VM configuration changes over time
- Global search across backups using multiple properties, including ID, name, tag, location, or resource group
- Rapid, near instant recovery for recent backups

Resources	Policy	Status	Last backup	Next backup	Backup size
<input type="checkbox"/> DB-prod	Gold	OK	Jan 18, 02:16 PM	Jan 18, 10:05 PM	16 GB
