  - Cash flow statement analysis
  - Profit & loss reports
- & many more...**

## PRE-BUILT ENGINEERING PACKAGES

This solution uses Azure Data Factory (ADF) to offer a pre-constructed, verified, and best-practice integration solution for various data sources. Say goodbye to time-consuming custom development and costly integration software licenses. This rapid and cost-effective solution is built on the widely-used Azure platform, making it a smart choice for your data integration needs.
