

Security Scan Pack

Our Security Scan Pack reduces vulnerability gaps to prevent information breaches, identity theft and fraud.

PROTECT YOUR MOST VALUABLE ASSET: YOUR DATA

Security Scan Pack is an as-a-service platform that provides the infrastructure necessary to perform comprehensive security vulnerability analysis and resolve security breaches successfully.

Cybercrime will cost \$6 trillion annually by 2021.¹

Organizations need to be prepared for preventing cyberattacks and must have a proactive approach to security in general.

CHALLENGES

- › More often than not, business demands do not allow the IT organization to take care of much needed security analysis and remediation tasks.
- › Not all companies have a specific area, expertise or budget for ensuring that the correct security strategy is in place.

OUR SOLUTION

- › A tool that allows organizations to identify top security threats without generating cost of ownership. Designed by specialists certified by EC-Council, our solution scans your target site for security vulnerabilities.
- › Includes a comprehensive vulnerability analysis report with references and recommendations for better protection.

DESIRED OUTCOMES

- › Ensure business continuity in a secure and trustworthy manner.
- › Decrease vulnerability vectors.
- › Maintain compliance with international safety regulations.
- › Obtain and maintain client trust through secure sites.
