

AnonyMed

[See the video here](#)

Anonymize, analyze, and accelerate healthcare innovation.

Establish a data architecture that serves as the **foundation** for **secure, compliant,** and **AI-ready** healthcare research

Benefits

- **Faster Insights:** Get compliant, AI-ready data in hours—not weeks—so you can launch projects and iterate models rapidly.
- **Lower Risk & Cost:** Automate PII/PHI removal to meet HIPAA/GDPR, cutting compliance headaches and pricey data-prep services.
- **Better Models:** Leverage realistic synthetic datasets that preserve key patterns, boosting AI accuracy without exposing real patient data.
- **Secure Collaboration:** Share rich data assets confidently with partners and researchers, unlocking new innovation while safeguarding privacy.

Why accelerate:

Regulations, security and privacy requirements should not hold innovations. Unlock the potential of the data securely with:

- PII/PHI anonymization
- Secure tokenization
- Synthetic data generation
