

AI-POWERED DOCUMENT INTELLIGENCE & CONTRACT ANALYTICS

The ThoughtTrace Platform

ThoughtTrace™ is an AI-Powered Document Intelligence Platform that delivers rich, contextual insights for complex documents and contracts. Our lightning-fast enterprise search, deep commercial insights, and intelligent document identification delivers value out-of-the-box for customers across industries. For customers requiring deep, domain-specific analysis, we offer Industry Packs that are pre-trained to deliver highly detailed and accurate results.

Unified Document Management & Contract Intelligence
Industry Specific Detail | Integrate with Ease | Works on Day 1

The ThoughtTrace Difference

Unparalleled Efficiency

Customers can uncover information in minutes or hours, not weeks or months (or never)

Domain Expertise

Built to answer specific questions for specific business domains.

Superior Understanding

Customers gain instant insights into their most difficult and complicated data

Enhanced Learning

Community models are constantly learning and growing

Very Quick Time-to-Value

Turn-key solution is easy to get up and running on day one

Depth of Extraction

Bring information to life previously impossible to find in large volumes of complex documents

Understand Your Agreements

In Minutes

Human Assisted Artificial Intelligence

Rather than spending hours on data entry, ThoughtTrace™ automates the most tedious, error-prone and repetitive tasks so your talented staff can utilize their skill set reviewing the data & information ThoughtTrace™ reads and locates for you.

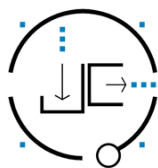

Automatic Document Separation & Classification

We understand that you are swimming in an ocean of files, both old and new. ThoughtTrace locates, separates, & classifies those documents, allowing you to find even the smallest fish in that ocean of information.

Document Intelligence & Contract Analytics

Process hundreds or thousands of documents in a day, and understand every obligation, opportunity, limitation and risk. Our models are built for your industry, & made to perform at scale.
