Microsoft Viva Intranet - Full Build

Our Microsoft Viva Connections Intranet Full Build establishes the gateway to your employee experience solution with Microsoft Viva, amplifying organisation culture and improving employee engagement through a task based personalized experience. Foster a culture where people and teams are empowered to be their best from anywhere.

Many organizations have been left asking: how can we improve our employee's wellbeing at work? In a hybrid work environment, absent a physical presence, how does a company create a sense of working for that company — a feeling of culture, mission, and connection?

What creates and defines the employee experience in the age of digital-first work?

The "place" where work happens – today and here on out – is the internet.

But modern work faces numerous challenges – highlighted below are issues identified through a variety of recent surveys conducted globally.
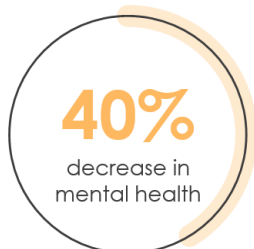

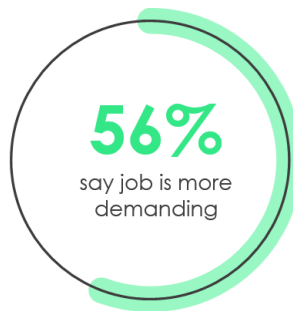

Modern work challenges in a hybrid work environment

60% are less connected

70% reported higher stress levels

56% say job is more demanding

79% say essential skills are a barrier to productivity

40% decrease in mental health

85% decrease in wellbeing

Only 1% of workweek to focus on new skills

15% feel engaged at work

26% feel up-to-date on company news

1 hour per day lost searching for (or recreating) information

The digital experience of working for a company *is* the employee experience.

Many employees complain that they cannot find the information they are looking for on existing intranets and that the news and policies on current intranets is often out of date or inappropriate for their role in the organisation. These issues impede employee enagement, intranet adoption, decision making efficacy and reduce productivity across the organisation.
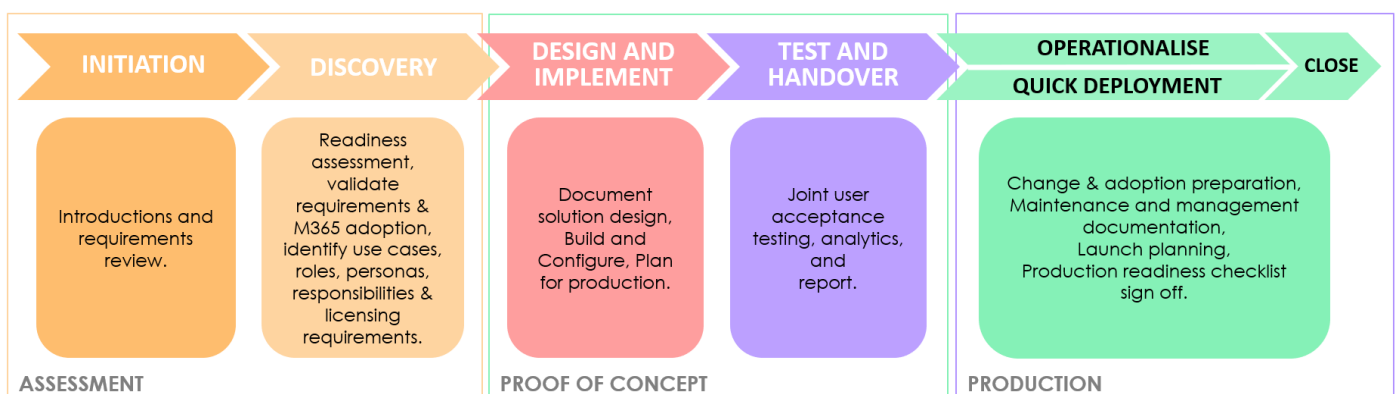

The Intelligent Intranet with **Microsoft Viva Connections** surfaces the right information and connections to the right people in the flow of their work. It is a company branded employee app in Teams. It is also the gateway to your employee experience, with personalized news, communications, tasks, people and resources. It empowers leaders to communicate and connect with their people, who can get easy access to the tools and resources they need, all within Teams. It also acts as a launching pad to the other Microsoft Viva employee experience modules. Connections provides connection to information and colleagues, improving productivity & reducing stress from having to search or recreate information.

What Does Our Viva Connections Intranet Full Build Provide?

We provide you with a Microsoft 365 Intranet framework and assist you with building a new (greenfield) Intelligent Intranet in SharePoint Online that is surfaced in Microsoft Teams. This includes designing a flexible & extensible Intranet site structure, providing departmental SME delegation for content authoring, defining menus & other navigational controls, identifying key personas for personalised content, establishing a content classification solution to support optimised search, surfacing related content, defining page templates for consistency, supporting business policy and news life-cycle management, the configuration of rich analytics to support tuning, adaptation and to monitor adoption challenges. This service includes significant knowledge transfer aimed at enabling self-sufficiency.

This enables your Intranet Teams to continue extending and improving your Intelligent Intranet going forward.

Intelligent Intranet Implementation Approach (3 to 6 Months)

INITIATION	DISCOVERY	DESIGN AND IMPLEMENT	TEST AND HANDOVER	OPERATIONALISE / QUICK DEPLOYMENT	CLOSE
Introductions and requirements review.	Readiness assessment, validate requirements & M365 adoption, identify use cases, roles, personas, responsibilities & licensing requirements.	Document solution design, Build and Configure, Plan for production.	Joint user acceptance testing, analytics, and report.	Change & adoption preparation, Maintenance and management documentation, Launch planning, Production readiness checklist sign off.	
ASSESSMENT		PROOF OF CONCEPT		PRODUCTION
