

Imagelitz: AI-Enhanced Image Management for Dynamics 365

Imagelitz empowers your organization to effortlessly manage and organize images within Dynamics 365. With AI-powered tag generation and metadata enrichment, you can streamline your workflow and ensure your images are always well-organized and easy to retrieve.

Key Features:

- **Effortless Upload:** Quickly upload multiple images in various formats, streamlining your workflow.
- **AI-Powered Tagging:** Automatically generate intelligent tags based on image content, making search and organization easier.
- **Metadata Management:** Add, edit, and maintain metadata for images to enhance categorization and improve searchability.
- **User-Friendly Interface:** Navigate and manage your image data efficiently with an intuitive, easy-to-use interface.
- **Entity Integration:** Seamlessly associate images with various entities (products, contacts, Accounts etc).
- **Bulk Image Upload:** Upload multiple images at once for efficiency.

With **Imagelitz**, you'll transform how your organization handles image data in Dynamics 365, boosting productivity, ensuring better organization, and delivering visually appealing results. Experience the power of AI-driven image management today.
