Get to know your users better

ABOUT StyleMatcher:

StyleMatcher uncovers information hidden in texts. Starting with gender or age, through language knowledge or education level, it goes all the way to complex information about personality and personal traits. Thanks to StyleMatcher, you can translate properties of text into knowledge of its author.

See what customers are saying:

"It is groundbreaking idea, which hasn't been explored by anybody else yet, but it might bring great value to enterprise companies."

– Radim Rehurek, CEO, RaRe technologies

WHAT WE OFFER

Online service with both rich API and analytic tools running on Microsoft Azure with integration of major communication tools such as Teams, Slack and many email services. Integration to databases containing CVs and other user texts is also supported.

Texts conceal a lot of information about their authors. If they are decoded properly, it increases your chance to select the best applicant based on their resumes and motivational letters, as you are given predictions of their company culture fit and personal traits immediately.

Once they join your organization, analyzing their textual interactions within the team can be used to look after their mental health and overall employee experience while respecting their privacy. Identifying any anomalies can help you take care of your employees, keep them happy, performing and contributing to your company's success.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
