# Predict Customer Demand

Understand what drives customer/patient demand

When you provide weekly customer volume, Aidan harnesses Artificial Intelligence and Machine Learning so that you can:

- see a correlation analysis on what drives your customer demand
- predict customer demand for new and existing customers
- make strategic decisions based on insights from real data
- gain insights to better manage staff

Take the guesswork out of decision-making.

Aidan will provide easy to understand analysis so you can see what drives your customer volume.
