Aidaxis
High Value Digital Adoption Service
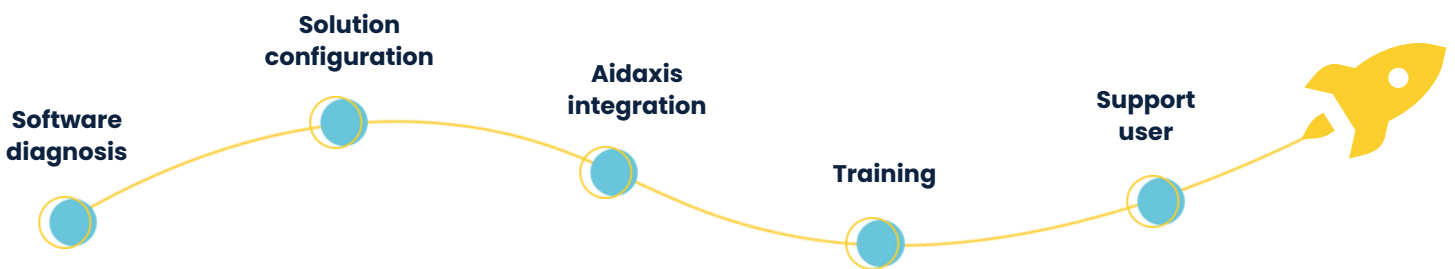

Digital Adoption Platform

What is a Digital Adoption PLatform ?

A solution deployed on your software to guide your users, step by step, in real time, in carrying out their business procedures. It can be used to accelerate onboarding, facilitate handling, address digital transformation, analyze the use of your applications, etc.

What are the benefits ?

- Facilitate **onboarding**
- Improve **user experience**
- Communicate **quickly on latest news**
- Optimize **change management**
- Improve **collective efficiency**
- Promote **inclusion**

Features

WIDGET
The continuously accessible widget directly on your software, reduces the stress of failure situations and promotes agility and digital well-being.

STEP BY STEP GUIDE
Thanks to the AIDAXIS GPS application, your employees are quickly autonomous and operational, including on less often used procedures.

ANALYTICS
Define your own indicators in order to measure, in real time, the adoption and use of your tools.

EDITOR
The editor allows experts to share their knowledge, to support the teams, to increase their skills, by creating assistance flows that will be launched by your end users.

SUPPORT
Have user support, accessible directly via the widget. You also have resources (FAQs, guides and release notes) on our new Fresh Desk platform.
