# Your Turnkey Solution for Windows Computers

Aiden's expert engineers and Intelligent Automation build, deploy, and update your computers so that they're compliant with your desired state policy.

> "The fact that Aiden achieved a reduction this high on top of our benchmark is remarkable. It proves how effective Aiden is at finding and fixing things that other tools and processes missed.

— **Managing Director, Infrastructure & Operations,** Regional, Health Insurance Organization

We handle the packaging, deployment, updates, and patching of your computers so they are consistently in compliance. Whether it's for daily operations or in an emergency, you won't have to lift a finger.

97%	**2,200+**	**75%**	**~1**
Reduction in vulnerabilities	Pre-Built Windows applications	Decrease in helpdesk tickets	Hour to rebuild a computer

Aiden works with any deployment solution and produces better outcomes

Business Outcomes

Free up resources for higher-value projects

Dramatically lower risks

Greatly improve consistency

Rapidly recover from ransomware

Simplify OS and application migrations

WITHOUT AIDEN

It takes around **55 days** to remediate **50% of critical vulnerabilities.**

Verizon 2024 Data Breach Investigations Report

WITH AIDEN

In less than **30 days,** Aiden remediates **100% of critical vulnerabilities.**

In critical-only mode and reported by NIST

Free up time to work on innovative projects to drive business growth.

Feature	Benefit
Application Packaging as a Service and a library of 2,200+ Windows applications (5x more than our nearest competitor).	We package **all Windows applications**, including generic, vendor, and custom apps, unless packaging is impossible. This frees up your top Windows engineers or replaces third-party patching services, and you're not limited to a small library of basic applications.
Easy to understand configurations.	Aiden generates and maintains your Desired State Policy in plain English. **Non-technical staff can understand and audit the policy** which is used to set up and maintain your computers with Intelligent Automation.
Replaces Windows imaging with pure automation.	Patented technology automates bare metal OS deployments and Windows Autopilot, customizing each computer by persona, department, and region with specific BIOS, firmware, drivers, and more. Built to **industry best practices**, it eliminates the need for master images, Sysprep, or PowerShell scripts to meet the desired state policy.
Complimentary to any deployment platform.	Our patented technology utilizes a single package that can be distributed by any deployment platform and is **not a persistent agent** needing elevated privileges. You have control over the schedule to run Aiden and can run it on-demand. It's very secure as it uses your deployment platform's permissions.
Intelligent Automation executes ongoing updates and patching and maintains compliance.	It's easy to make any application(s) on a computer, the computer, a user group or the entire enterprise, compliant. Your IT team's manual **work to update and patch computers is completely automated by Aiden.**
Reporting on CVE & critical misconfigurations with scheduled or on-demand remediation.	Aiden provides a detailed view on CVEs and misconfigurations deemed critical in your environment and when they will be remediated based on your policy.
Dramatic reduction in vulnerabilities.	Aiden can automatically remediate **100% of critical CVEs and misconfigurations in less than 30 days**, compared to an industry average of only 45% in 60 days. The third most common reason for security breaches is unpatched software and Aiden minimizes this risk.
Rapid recovery from ransomware.	Aiden enables **recovery of a computer from ransomware in about an hour**, recovering thousands of computers in days rather than months for a typical manual process, ensuring minimal downtime.
Simplified and automated in-place upgrades for Windows OS.	Windows OS upgrades are just an update to the your desired state policy, and are no longer complex, time-consuming migrations.
Easy transitions from any deployment platform to any deployment platform.	Transitions from Systems Center ConfigMgr (or any platform) to Intune (or any platform) **is a simple process instead of a labor-intensive migration project.**
Proof of compliance for SOC2, ISO, and other audits.	Aiden simplifies audit preparation by providing **clear, easily understandable proof of compliance using plain English.**
