

MAXICONNECT

**CROSS-BORDER TRAVEL SIM &
TRADE ENABLEMENT**

www.maximumgroupdigital.co.za

INTRODUCTION

Connecting Africa Through Secure Mobility

MaxiConnect is a secure, low-cost cross-border Travel SIM solution designed to empower mobility, trade, and digital inclusion across Africa. Tailored for traders, transporters, and officials, it offers seamless connectivity with low roaming fees and consistent network coverage across DRC, Guinea, and neighboring countries. Built-in cyber protection via MaxiCyber ensures safe communication, while optional digital wallet and data compression integrations unlock further value for cross-border commerce. MaxiConnect aligns with regional economic cooperation goals and supports the digital infrastructure priorities of Francophone Africa, making it a powerful enabler for secure trade, communication, and financial transactions across the continent.

REGIONAL MOBILITY & TRADE IMPERATIVES

Unlocking Movement Across Francophone Africa

Cross-border trade and regional mobility are essential for economic growth in DRC, Guinea, and surrounding countries. However, high roaming costs, poor connectivity, and security concerns hinder seamless movement. With increased regional cooperation and digital transformation agendas, there's a growing need for integrated mobile solutions that support communication, commerce, and secure travel.

THE OPPORTUNITY IN FRANCOPHONE AFRICA

Growing Trade Integration

Francophone Africa is accelerating regional economic partnerships, increasing demand for seamless, secure communication across borders to support trade.

Affordable Roaming Demand

High roaming costs limit cross-border communication. There's an urgent need for cost-effective, multi-country mobile solutions for frequent travelers.

Connectivity Infrastructure Gaps

Many trade corridors lack consistent mobile coverage, creating communication barriers for traders, transporters, and regional economic development efforts.

Financial Tool Access

Informal traders and mobile merchants need simple, secure digital wallets to support cross-border payments and value transfers in real time.

WHAT IS MAXICONNECT

Powering Safe, Smart Regional Mobility

MaxiConnect is a secure, multi-country Travel SIM platform purpose-built for seamless regional mobility across Africa, with a focus on DRC, Guinea, and neighboring nations. Designed for cross-border traders, transporters, and officials, MaxiConnect offers low roaming costs, reliable coverage, and user-friendly setup. The platform is cyber-secured by default through integration with MaxiCyber, ensuring protection for all voice, SMS, and data activity. MaxiConnect also enables optional digital wallet integration for secure payments and trade transactions, and data compression for optimized performance. This all-in-one solution supports economic growth, digital inclusion, and trade facilitation across Francophone Africa's evolving digital infrastructure landscape.

MAXICONNECT TRAVEL SIM – KEY FEATURES

MaxiConnect Travel SIMs are built for convenience, affordability, and cross-border functionality. With low roaming costs, reliable coverage, and plug-and-play ease, they are ideal for traders, transporters, SMEs, and officials who require secure, uninterrupted connectivity across multiple African regions.

AFFORDABLE ROAMING RATES

Save on mobile costs while staying connected across borders with our low-cost roaming structure.

RELIABLE REGIONAL COVERAGE

Enjoy consistent, uninterrupted network access in DRC, Guinea, and neighboring African trade routes.

BUILT FOR MOBILITY

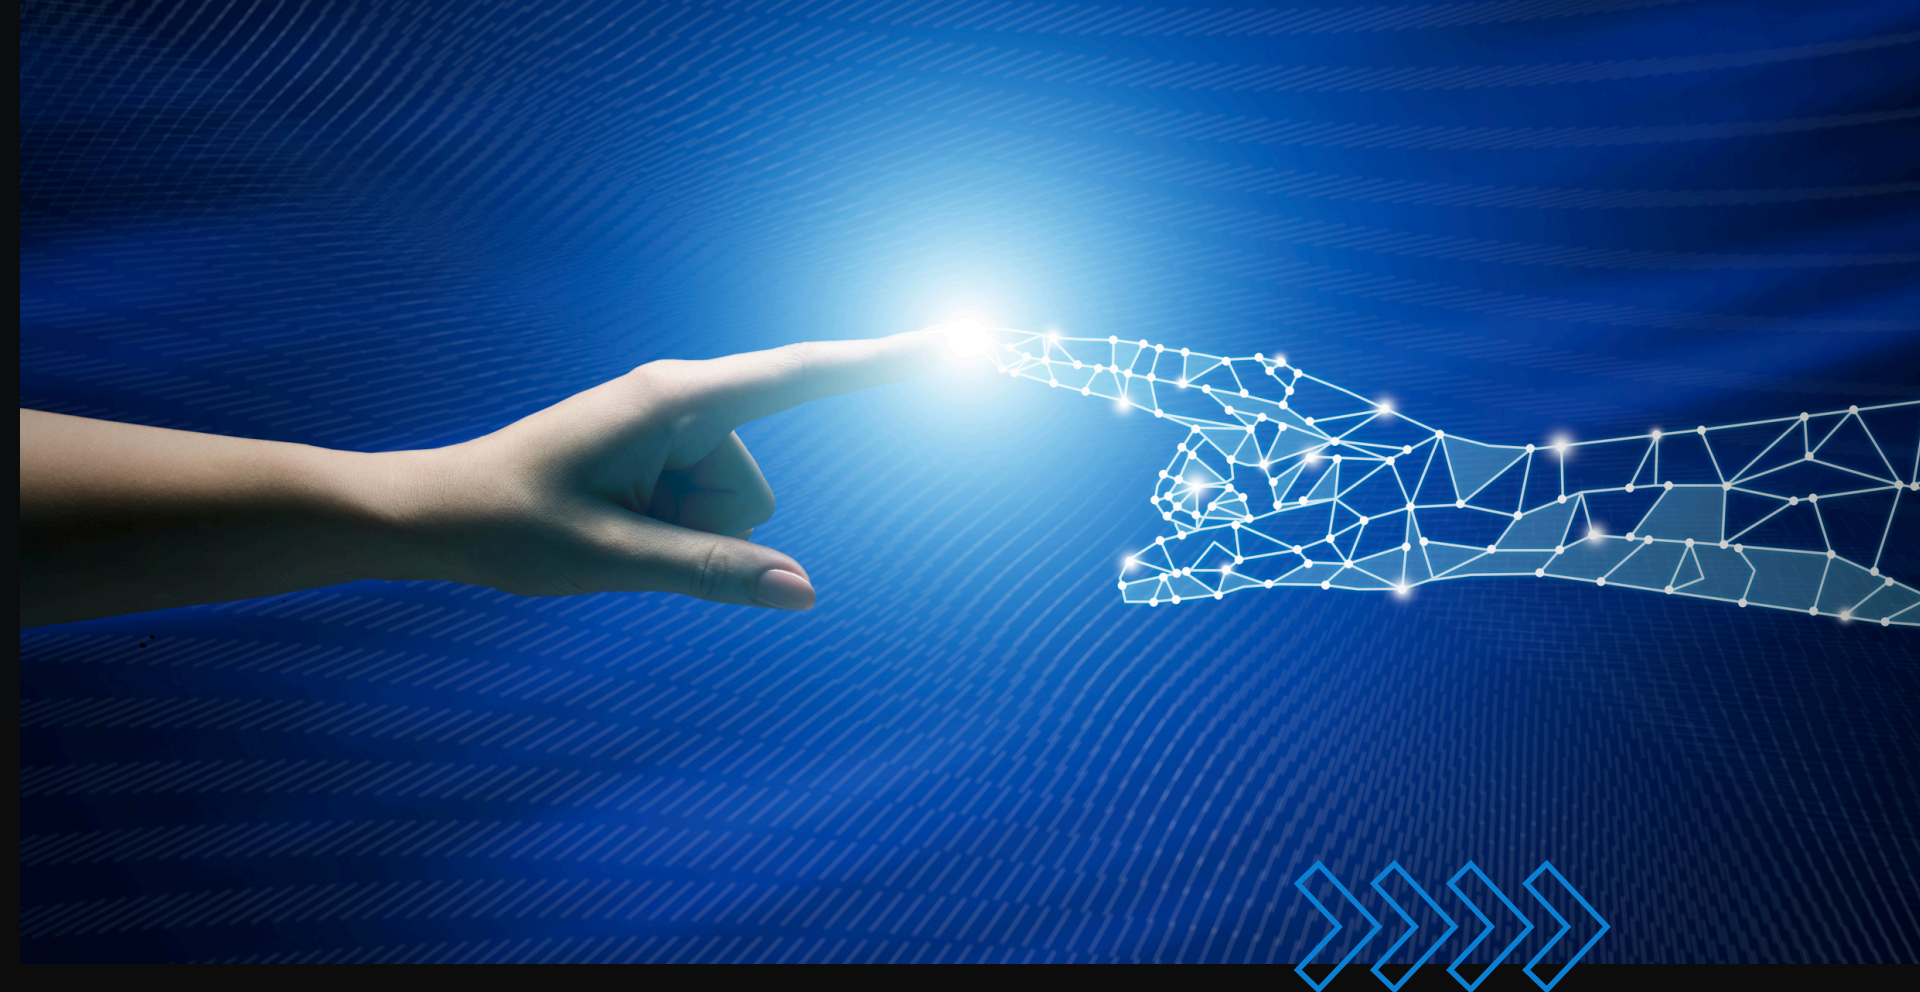

Tailored for traders, SMEs, and officials needing secure, cross-border communication on the move.

EASY SETUP EXPERIENCE

Plug-and-play SIMs that activate quickly with no complex installation or configuration required.

CYBER- SECURED BY DESIGN

Protecting Communication Across African Borders

MaxiConnect SIMs are secured by MaxiCyber, offering real-time threat detection and data protection across networks. Whether it's voice, SMS, or data, users benefit from strong cybersecurity—perfect for high-risk regions and essential communication in cross-border trade and government operations.

✓ Threat Monitoring

Continuous surveillance defends users from cyberattacks in real time.

✓ Data Security

Encrypts all mobile traffic for maximum communication privacy.

✓ Regional Protection

Built for Africa's high-risk, high-mobility environments.

✓ Trusted Communication

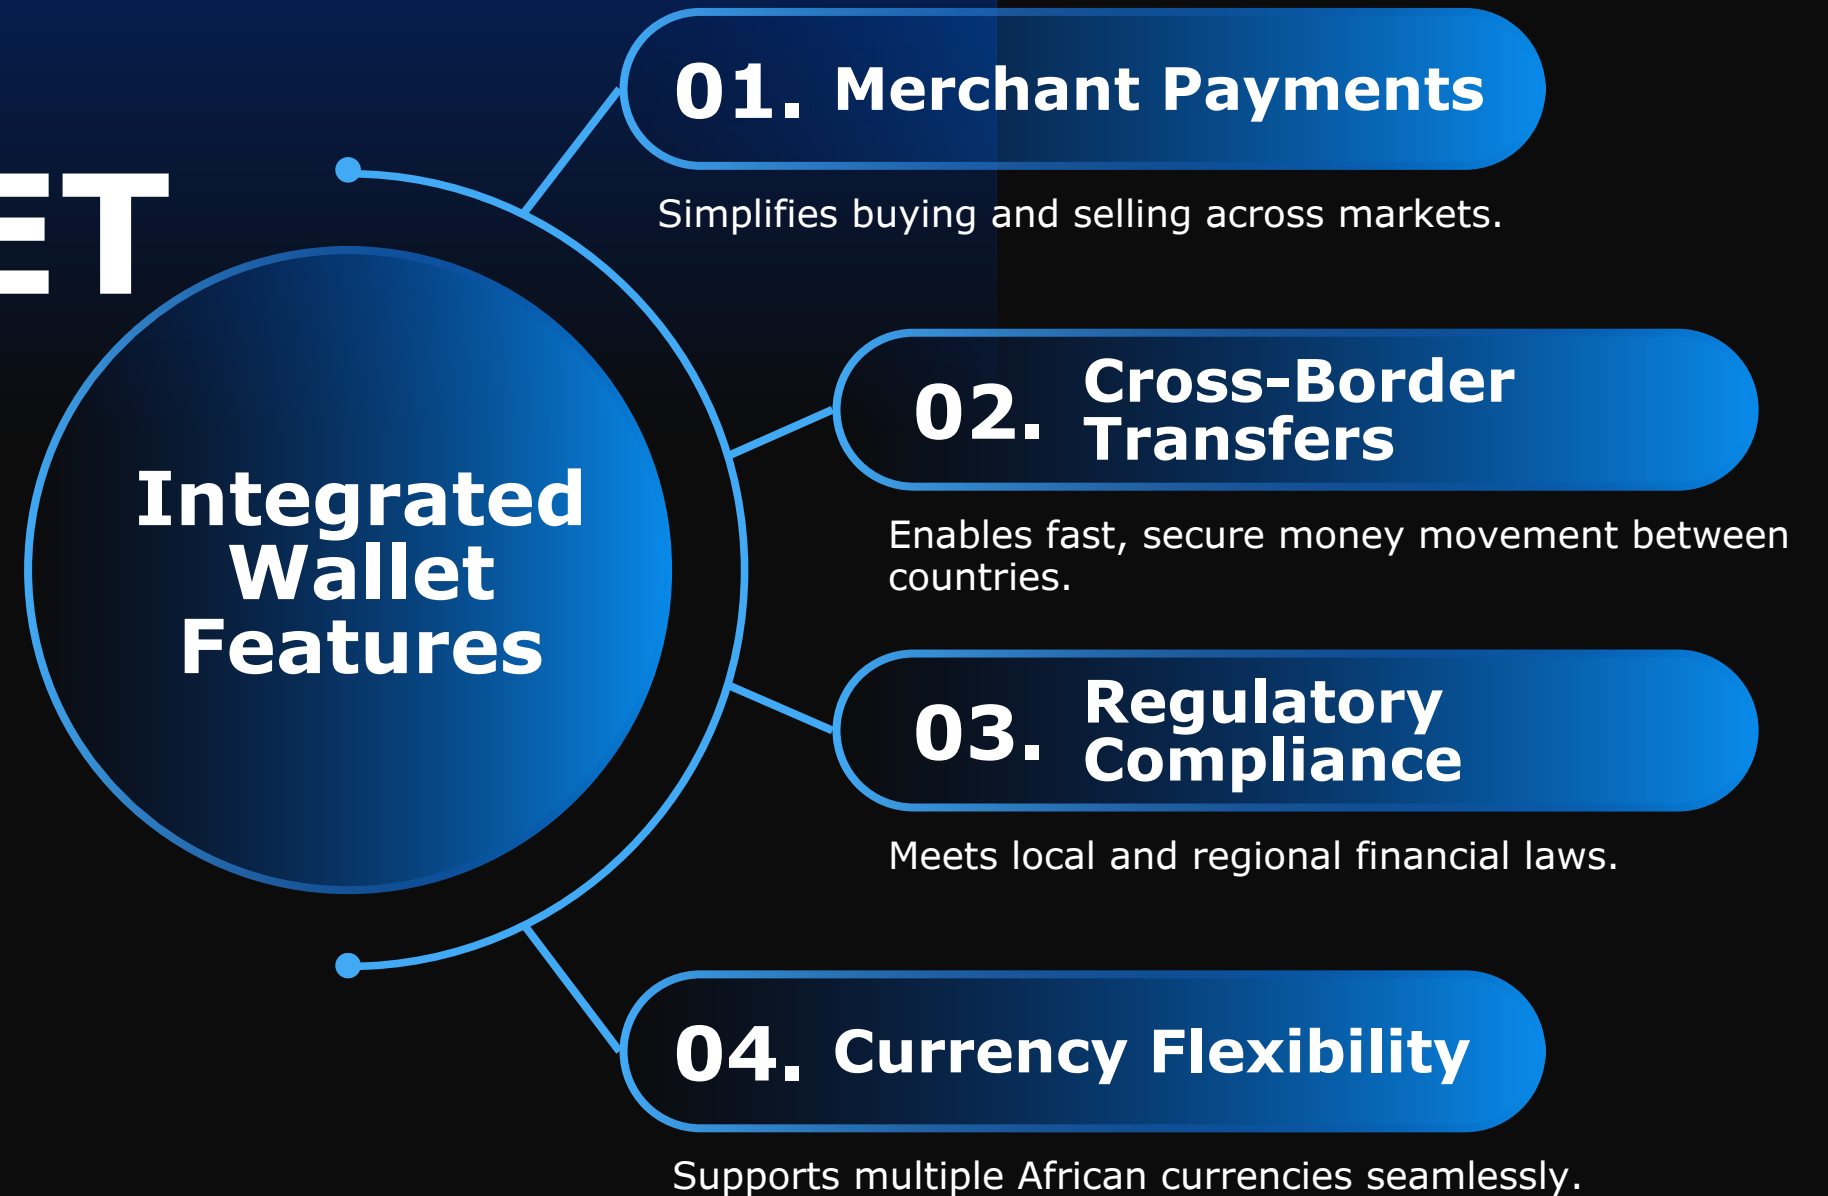

Ideal for officials, traders, and critical mobile users.

OPTIONAL DIGITAL WALLET INTEGRATION

Empowering Trade Through Mobile Finance

MaxiConnect's optional digital wallet integration turns the SIM into a powerful tool for cross-border commerce. It enables fast, secure payments for merchants, informal traders, and mobile users. Fully regulatory-compliant and local currency compatible, this white-label solution supports financial inclusion and positions partners as regional FinTech leaders.

OPTIONAL DATA COMPRESSION TECHNOLOGY

Maximizing Data in Every Region

MaxiConnect's optional data compression technology helps users get more value from every megabyte. Perfect for rural or low-bandwidth areas, it improves speed and reduces costs without compromising performance. Ideal for accessing apps, trade platforms, and cloud services—whether on the road, in remote regions, or urban hubs.

✓ **Bandwidth Optimization**

Compresses data to boost performance in low-signal areas.

✓ **App Access**

Ensures smooth operation of key business and trade apps.

✓ **Cost Efficiency**

Reduces data usage to extend user airtime affordability.

✓ **Cloud Support**

Enhances access to cloud-based tools and storage platforms.

STRATEGIC VALUE TO STAKEHOLDERS

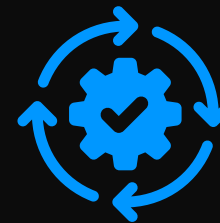

MaxiConnect delivers strategic value by enhancing cross-border trade, supporting digital infrastructure goals, and promoting regional integration. Its secure, scalable solutions empower governments, businesses, and mobile users, aligning perfectly with Francophone Africa's economic development and digital transformation priorities.

Trade Flow Enablement

Facilitates faster, safer cross-border transactions and communication, driving economic activity in key trade corridors.

Regional Integration Acceleration

Promotes unity through shared platforms that connect countries, economies, and people more efficiently.

Digital Infrastructure Support

Complements national efforts to expand mobile access and modernize telecommunications frameworks across the region.

Public-Private Partnerships

Opens collaboration between governments, telcos, and enterprises to scale inclusive, tech-driven growth initiatives.

PILOT & DEPLOYMENT OPPORTUNITIES

Collaborative Rollout Across Key Corridors

MaxiConnect is ready for pilot deployment in high-impact trade corridors across DRC and Guinea, offering a real-world showcase of its secure, cross-border Travel SIM capabilities. Our rollout plan includes partnerships with local telecom operators, government ministries, and regulatory bodies to ensure alignment with national priorities. The pilot will demonstrate connectivity, cybersecurity, and optional wallet functionality in active trade zones. With a structured deployment roadmap, onboarding support, and monitoring mechanisms, MaxiConnect aims to build a scalable model that can expand into neighboring markets. This initiative offers stakeholders a chance to lead digital transformation and economic integration across Francophone Africa.

CYBERSECURITY TRENDS

Join us in shaping the future of secure, cross-border connectivity and trade in Francophone Africa. Partner with MaxiConnect to pilot innovative mobile solutions that drive growth, empower users, and support regional integration. Let's build Africa's digital infrastructure—together.

ABOUT MAXIMUM GROUP

Maximum Group are mega project property developers that infuses brick-and-mortar developments with technology and IT clouds by merging the brick with the cloud. Mr Slaven Gajovic is the founder of 2 groups of companies - Ariobex Group (www.ariobex.co.za) and Maximum Group (www.Maximumgroup.co.za) and have 2 mega projects - Dan Tloome Mega Project (www.dantloome.co.za) where we busy building a new settlement for 150 000 people, and West Rand Mega Park (www.westrandmegapark.co.za) - a new Special Economic Zone and regional industrial and agricultural hub.

Mr Gajovic is also the founder of the Mega Project Association of South Africa - <http://www.megaprojectsassociation.africa/> - and are regularly in touch with other mega projects developers.

Maximum Group is also involved in subsidiary businesses developing and implementing (all represented in megaprojects) and our own in-house IT platforms

- Urban Solar Farms - 10MW and bigger
- Water and effluent treatments
- Smart metering & monitoring,
- Fibre and ICT
- AgriTech - digitizing farming processes from seed to fork (www.Farm2Fork.org.za). This platform can specifically be of use in agriculture as it digitizes the whole process in the agricultural value chain and assists with product traceability, smart logistics, farmer training, satellite imagery, weather alerts, smart payments and so on, thus empowering farmers to produce more with what they have.

- Fintech - crowdfunding platforms (www.realestatecrowdfunding.co.za) in property and agricultural (<https://agricrowdfunding.co.za/>) space
- Blockchain-based Digital Supply Chain (<https://maxichain.maximum-dev.cloud/>) - can be adjusted to any process and digitize it completely - whether its mining or wine making or manufacturing or donations
- World's first WEB3 international digital bank with a unique blockchain-based payment system, approved by US FEDS and Canadian Financial Authority (<https://fcbank.maximum-dev.cloud/> and <https://u.pcloud.link/publink/show?code=XZYub4VZfn2wHVIHIXLB6FeymDM4dFXCUFUy>)
- Blockchain-based academic platform (<https://you-science.xyz/>) - enables publishing academic papers speedily and cost-effective as well as assists universities and students with easier assignments' writing
- Peer2Peer secure communication - (<https://www.maxip2p.com/>)
- Unique Smart Data Compression that compresses streaming to 15 times less while maintaining 99% of quality. - i.e We can stream full HD video viewable in 2G/GPRS connectivity; Also we can stream video on a 6.4kbts bit rate, Or we can stream 2-way video calls over 2-way radios (16kbps bandwidth). This tech can set the streaming parameters upfront to avoid buffering and connectivity cuts in streaming and videos. This means rural areas can have streaming videos for entertainment or education. ABOUT SLAVEN GAJOVIC

Slaven Gajovic is a visionary property developer, investor, and entrepreneur with more than 30 years of experience in the real estate and infrastructure sectors. Originally from Serbia, Slaven relocated to South Africa in 1992 during a period of regional political instability. Shortly after arriving, he established his first real estate company in 1993, marking the beginning of a dynamic career dedicated to large-scale property development and investment.

Today, Slaven serves as the Founder and Group Executive of Maximum Group Holdings and Ariobex Holdings Group, two diversified entities operating across a wide range of industries. These include commercial and residential real estate, mega-project development, smart city infrastructure, renewable energy, water purification, and educational systems. Under his leadership, Maximum Group's growing technology division has expanded its footprint into FinTech, AgriTech, cybersecurity, blockchain technology, NFTs, and intelligent payment solutions.

A strong advocate for merging traditional property development with digital innovation, Slaven has become a well-known figure in both South African and international property investment communities. He is the founder of the Mega Projects Developers Association of South Africa, a platform that brings together stakeholders involved in the development of strategic, large-scale infrastructure and human settlement projects.

Slaven is also the creator of the Conscious Property Alchemy business model and the RDP 2.0 – Connected Societies framework. These concepts reflect his forward-thinking approach to development—one that embraces smart technologies, sustainability, and community upliftment. His work aligns with the core principles of the Fourth Industrial Revolution and Society 5.0, aiming to bridge the digital divide and deliver integrated living environments that meet the evolving needs of modern society.

His personal and professional motto, "Profit while doing good," underscores a commitment to socially conscious development. Through his companies, he supports the creation of inclusive, self-sustaining communities with access to infrastructure, education, technology, and economic opportunity.

Slaven's influence extends through a broad network of collaborators, industry professionals, and strategic partners. With a track record of delivering impactful projects, he remains committed to reshaping Africa's development landscape and driving progress through innovation, collaboration, and purpose-led leadership.

ABOUT MAXIMUM GROUP DIGITAL

Maximum Group Digital is a trailblazer in crafting innovative, future-focused solutions that empower change and accelerate global digital transformation. Operating at the intersection of technology and impact, we specialize in a dynamic range of sectors including cybersecurity, agritech, fintech, communications, education, and events. Our mission is to harness the power of cutting-edge technology to solve real-world challenges, drive sustainability, and uplift communities and businesses in Africa and beyond.

By integrating advanced systems and forward-thinking strategies, we help our partners improve operational efficiency, mitigate risk, and unlock new growth opportunities. Whether developing secure digital infrastructures, advancing smart agriculture, or building scalable fintech ecosystems, our approach is rooted in innovation, collaboration, and resilience.

Our team of visionaries, and strategists are united by a shared goal—to redefine the possibilities of digital impact. We work closely with public and private sector stakeholders to co-create solutions that are not only transformative but deeply aligned with social and economic development goals.

With a global perspective and a commitment to inclusive progress, we aim to shape a digitally connected world where transformation is accessible and impactful. Our solutions are designed not just for today, but for the evolving needs of tomorrow—helping governments, enterprises, and startups stay ahead in a rapidly changing digital landscape.

At Maximum Group Digital, we don't just follow trends—we set them. Join us in leading innovation and creating lasting, meaningful change across industries.

THANK YOU!
