Spatial Intelligence Overview
Spaces Made Intelligent

The only camera-led spatial intelligence platform. AiFi's technology is the only solution on the market that creates a complete 3D digital twin of a space, empowering businesses to understand their spaces in real time.

> ### At the forefront of *next generation* vision AI

What we do

We utilze our *spatial intelligence* AI to derive the context of how people, objects and spaces interact with one another for our enterprise clients and customers.
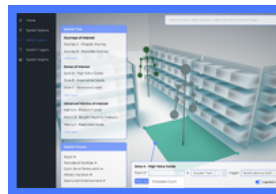

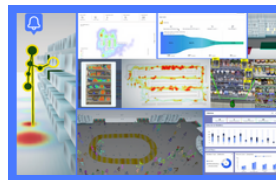

How we do it

Our platform redefines spatial understanding by creating **dynamic digital replicas,** providing **real-time, 3D** insights into interactions between **people, objects, and spaces** to drive optimization and enhance performance across sectors.

1 CAPTURE
entire physical space in 3D

2 MODEL
create 3D digital twin

3 LAYER
automations & integrations

4 ACT
upon real-time insights, alerts & behaviors

Where we are

Stadiums & Arenas   Theme Parks   Travel   Grocery / Grab&Go   Warehouses

Consumer Retail   Quick Serve   Hotels & Hospitality   Hospitals   Workplace/Offices
