aiimi
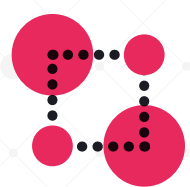

THE AIIMI INSIGHT ENGINE | **LEGACY DECOMMISSIONING**

Flexible legacy decommissioning, built for the long-term.

Maintaining legacy applications is a costly process — often consuming up to 75% of an organisation's IT budget, and climbing each year.

When it's time to decommission, the data contained within a legacy application is still critical for business operations. You can't just delete it, so how can you make it work for you?

The Aiimi Insight Engine provides out-of-the-box, flexible capabilities for searching, navigating, and displaying legacy data. It's user-friendly, cost effective, and built to make decommissioning simple, every time.

POWERED BY **THE AIIMI INSIGHT ENGINE**

Connect
Using its open connector API, the Aiimi Insight Engine can connect to any systems storing legacy file information — from cloud BLOB storage, to your data lakes or file shares.
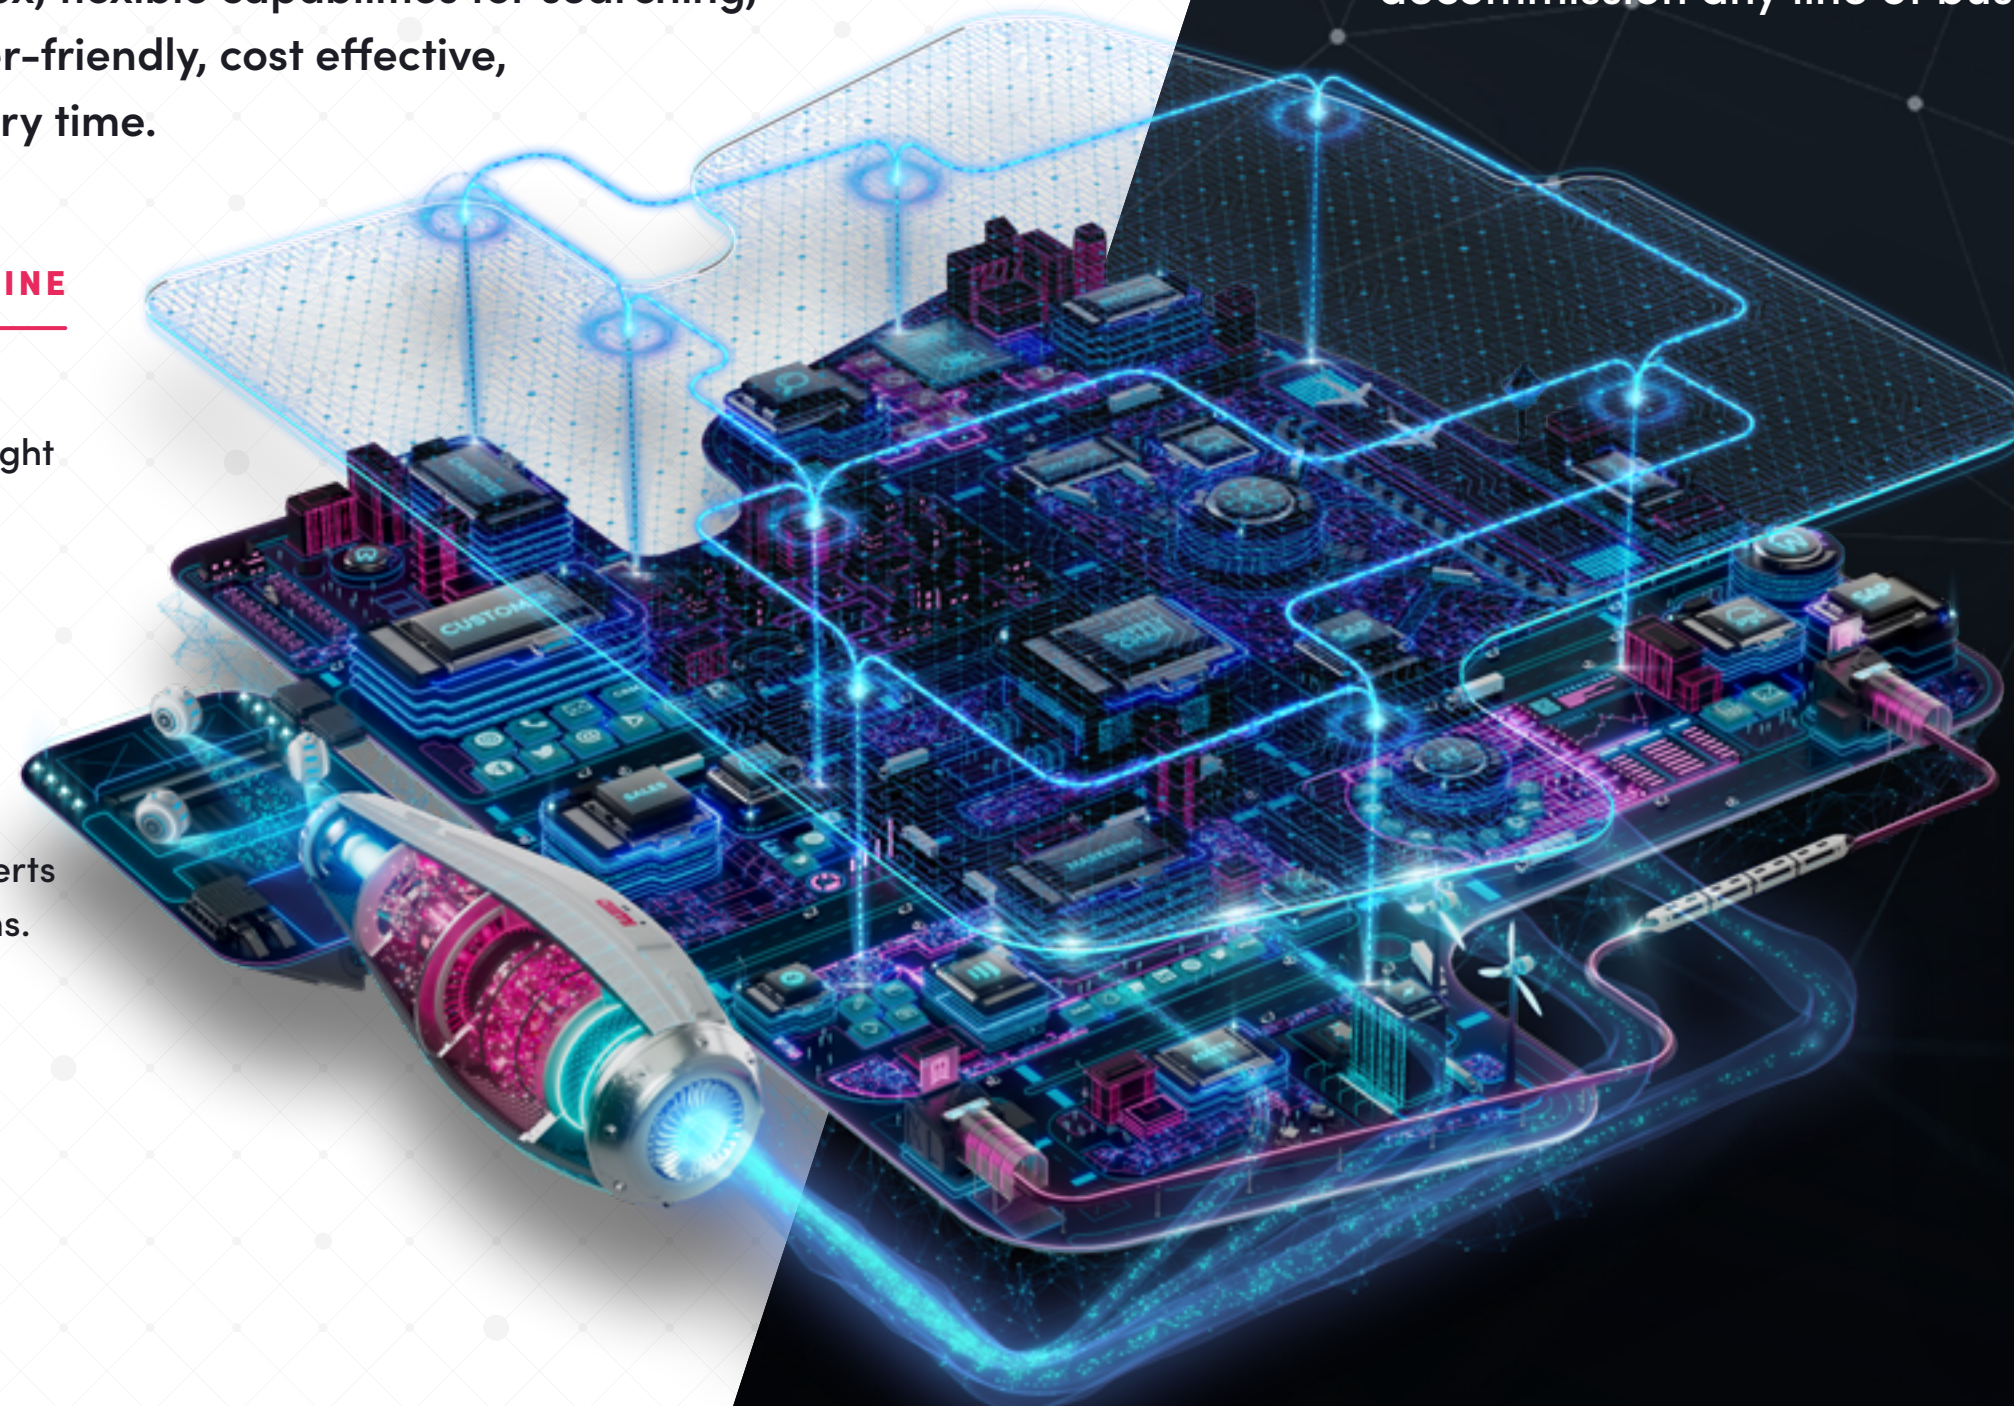

Discover
Our Services team will get you up and running, fast. The platform's in-built tools ingest data and documents, while our experts carry out ETL from your legacy applications.

Enrich
The Aiimi Insight Engine automatically enriches information, helping you derive brand-new value from your legacy data — and reduce risk.

WHAT YOU GET

✓ **Open connector API** connects to any system, so you can be sure no legacy information gets missed. Plus, CSV, XML, and JSON data ingestion ensures comprehensive decommissioning of both data and documents.

✓ **Our expert Services team** will help you carry out ETL from legacy applications to decommission any line of business system.

✓ **Auto-enrichment powered by ML** ensures your legacy decommissioning processes add value, not just expense.

✓ **User-friendly data discovery tools** enable users to search, navigate, and display legacy data with ease. No training required, just start querying.

✓ **Legacy data risk management** made simple with AI-powered tools to identify and protect high-value and sensitive data.

✓ **Reduced legacy maintenance costs** generate long-term value as you use the Aiimi Insight Engine to decommission further end-of-life applications.

HOW TO USE IT

Take a look inside the Aiimi Insight Engine — and find out how its AI technology makes legacy decommissioning simple and valuable.
