

THE AIIMI INSIGHT ENGINE - SEARCH & DISCOVERY

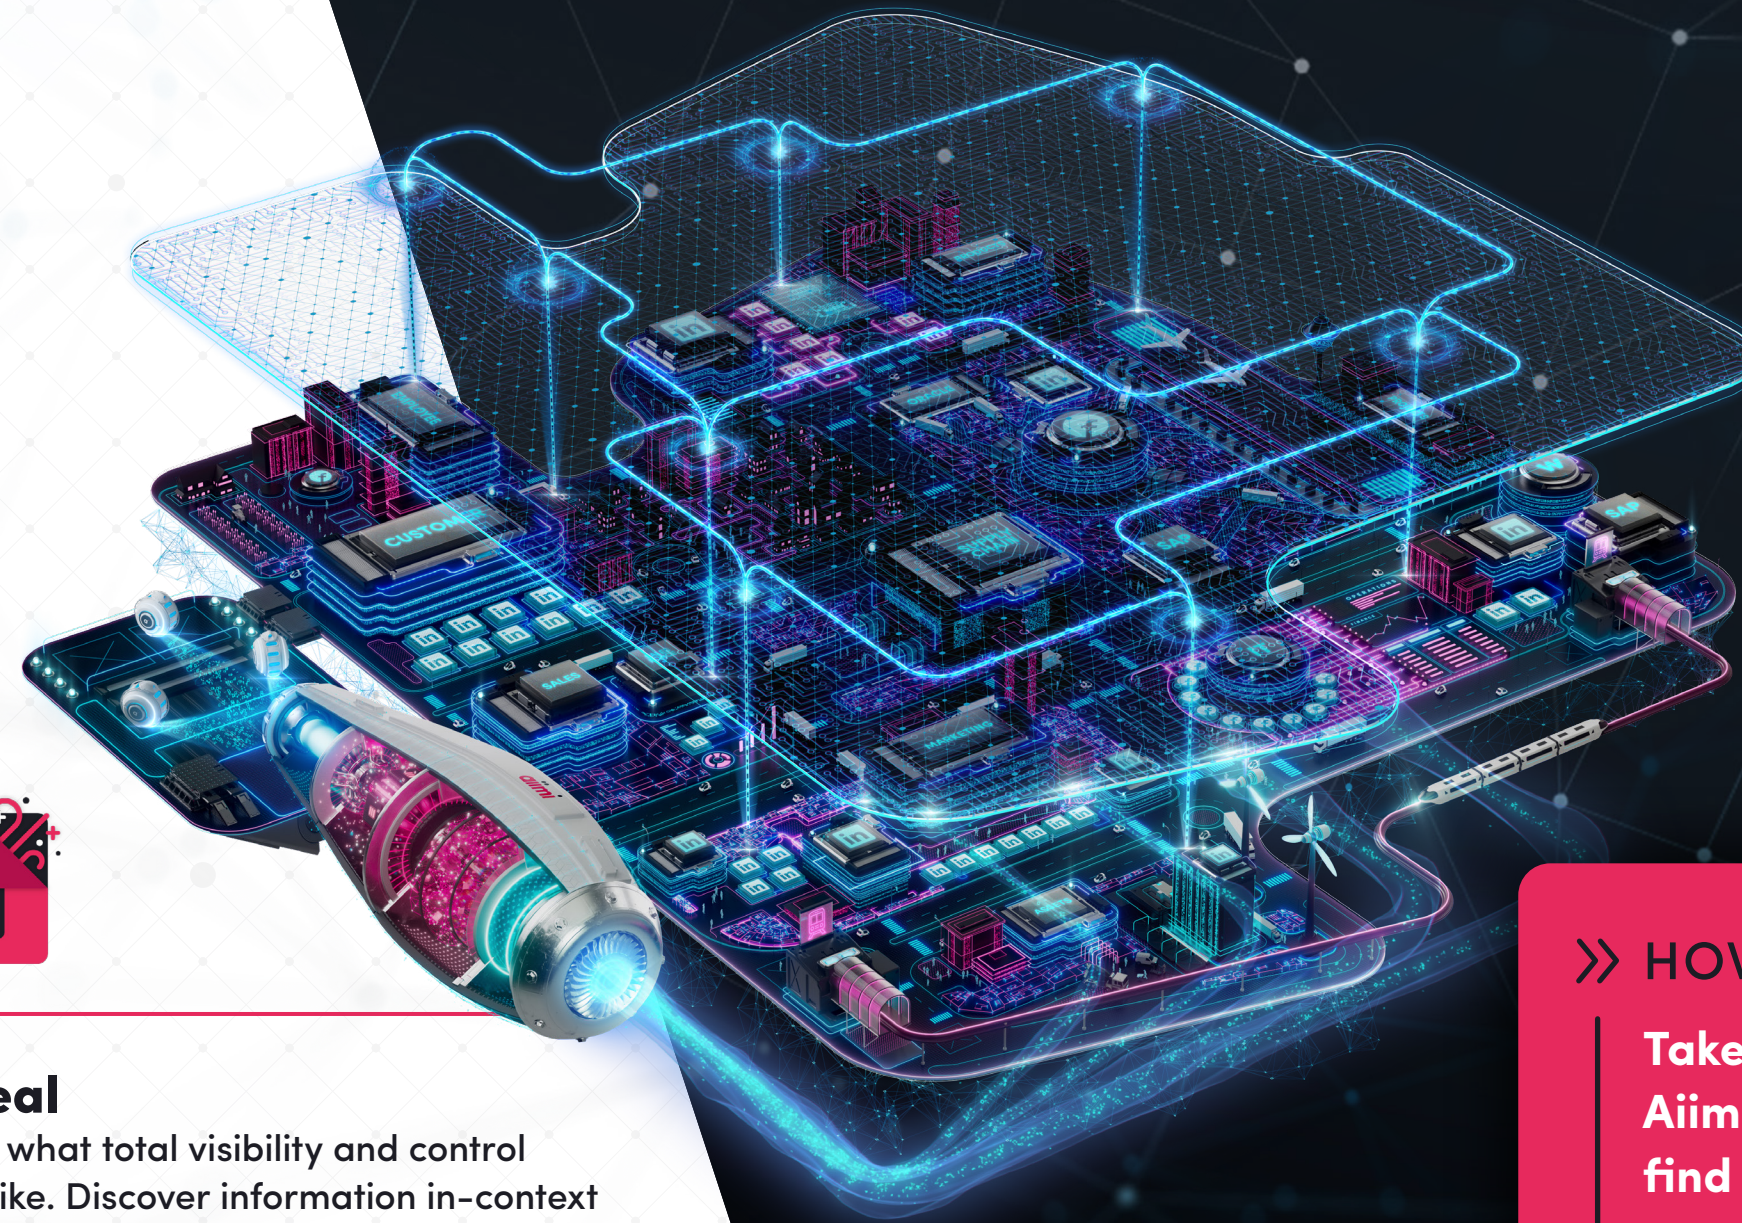

Discover the power of the interconnected enterprise.

More than 90% of an organisation's information is hidden away from people who need to find it – and 73% of data is only ever used on the same day it's created. Accessed once, and never opened again. Employees are spending hours looking for information they don't have permission to see, and then they're systematically recreating information that already exists.

By discovering and interconnecting all data across your enterprise, the Aiimi Insight Engine puts relevant information at your fingertips and delivers actionable insights at the moment you need them. And with fully-customisable enrichment steps, you can create the insight applications you need. Built for enterprise scale and security, it's the lightning-fast, accurate, and intelligent way to manage your information.

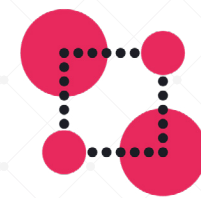

WHAT YOU GET

- ✓ **Enterprise-wide data discovery** with a range of source connectors and open connector API, so your information stays in the systems where it belongs
- ✓ **Lightning-fast cross silo search** using complex query, synonym-based, Natural Language Processing, and filtered facet-based search technologies
- ✓ **Enterprise security and access control at hyperscale**, respecting source permissions for all users
- ✓ **Interleaved results** connecting data with content for maximum insight
- ✓ **Auto-enrichment powered by machine learning** including document classification, clustering, and Named Entity Recognition
- ✓ **Intuitive search interface** plus information analytics dashboards for admins
- ✓ **Visualisation tools** for all-new ways to explore relationships between your information

Locate

The Aiimi Insight Engine indexes petabytes of data and millions of files, across all your enterprise systems and silos. Nothing gets missed. Everything is discoverable, searchable, and relevant.

Connect

Our Insight Engine connects everything across your organisation. With the power to interleave data and content, you'll uncover and be alerted to brand-new insights, and reveal never-before-seen connections and relationships.

Reveal

This is what total visibility and control looks like. Discover information in-context and get more of what you need with AI enrichment. Plus, with search that respects source permissions, there's no more worrying about unauthorised access.
