

AI.ML.WARE

AI-Enabled
Next Gen IOT Hardware

#startupindia

The Company

A DIPP Recognized Startup

Cert No : DIPP83077

OUR VISION

To enable digitisation of all devices by providing the next generation AI/ML enabled IOT hardware to provide end to end secure and automated solutions across industries.

OUR TECHNOLOGY

Our unique AI engine enables **Artificial Intelligence at the edge** by providing real-time operations. All our devices use end to end encryption, support multiple wireless technologies and have very low energy and carbon footprint.

Industry 4.0 EMS

Features

WORLD'S SMALLEST 4G GATEWAY IN A BOX

Branch Level IOTGateway comes pre-deployed in a thin client device. "Plug-n-play" operations.
Costs \$1-2 per SQFT

SENSOR / IOT INTEGRATIONS

Integrates with leading Smart Switches, Smart Energy Meters, Temperature & Humidity Sensors, UPS, Air Quality, Footfall Counters etc, including custom made all in one sensors

REMOTE MONITORING

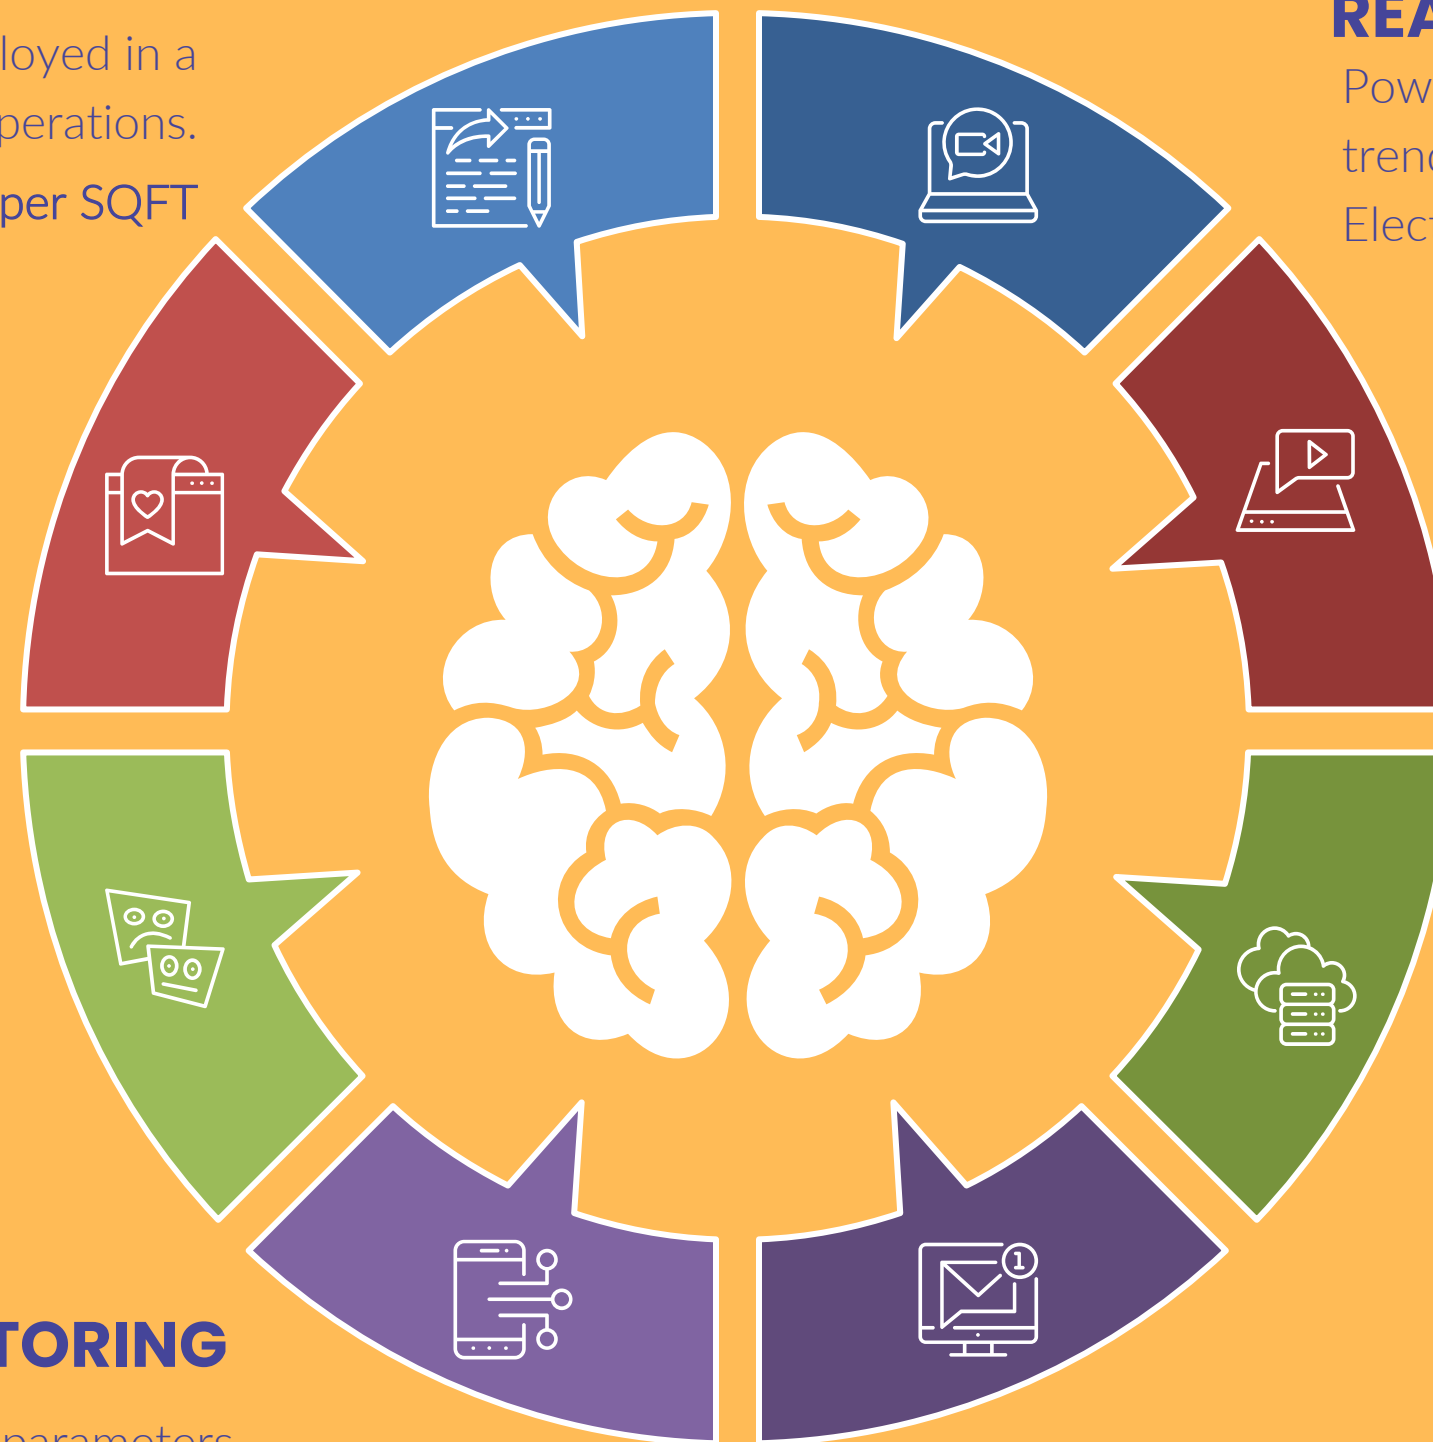

Monitor and alert operational parameters without physical presence

REAL TIME ENERGY AUDITS & ANALYTICS

Power Quality Management, Energy Utilization & trends, Loss/leakage detection & Savings potential, Electrical Imbalances, Anomaly detection

FIELD STAFF MOBILE DASHBOARD

Location wise Equipment monitoring, Alerting on a mobile enabled dashboard.

Our Smart EMS Suite

Monitor Everything!

IOTSensors

- Wireless thermal sensor system
- Monitors GRID temperatures, Ambient Temperature, Humidity.

IOTGateway

- World's smallest **ALL-IN-A-BOX IOT Platform**
- Interfaces with numerous IOT sensors
- Built-in
- Advanced workflow and rule engines

Our Smart EMS Suite

Monitor Everything! And More...

Energy Dashboard

Monitoring, Analysis and Alerting of electrical data from all smart energy meters!

UPS Dashboard

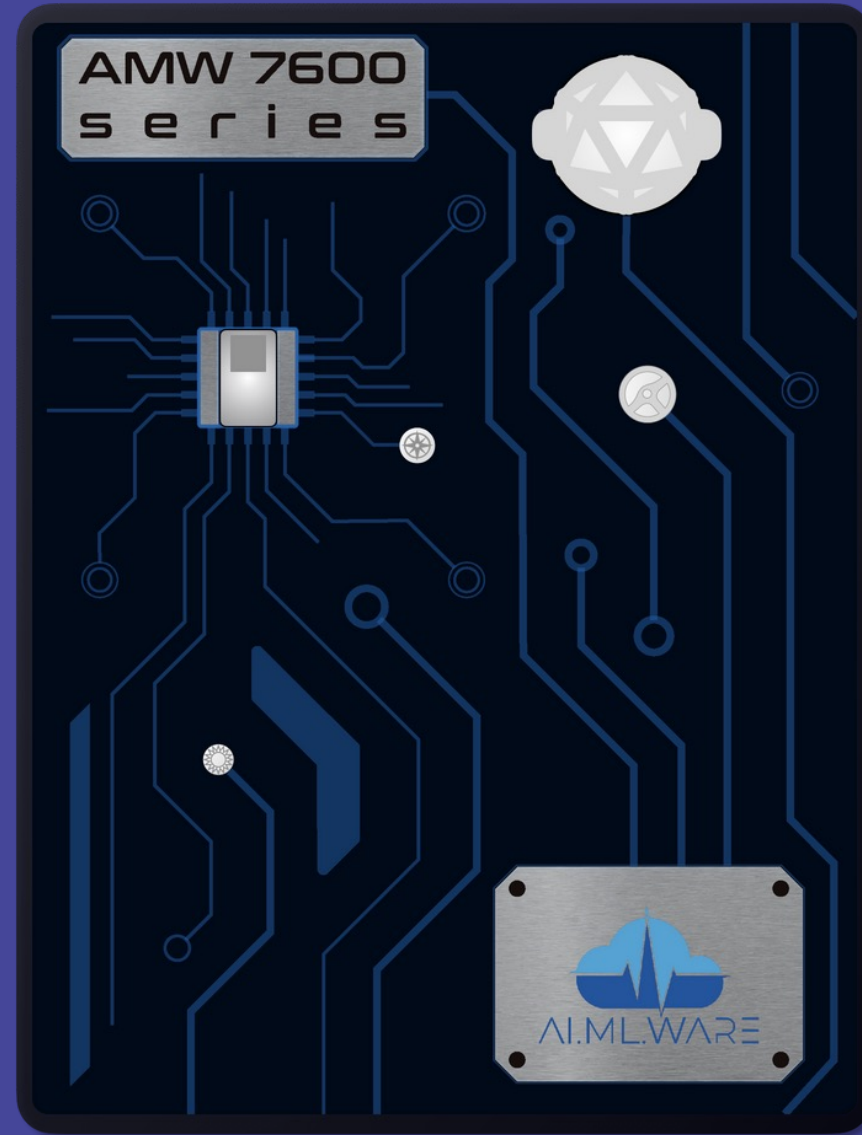

Monitor load, input, output and battery condition* with configureable alerts!

Flow Dashboard

Monitor flow meters, totalisers.
Analyse their usage patterns.

OUR EMS PRODUCTS

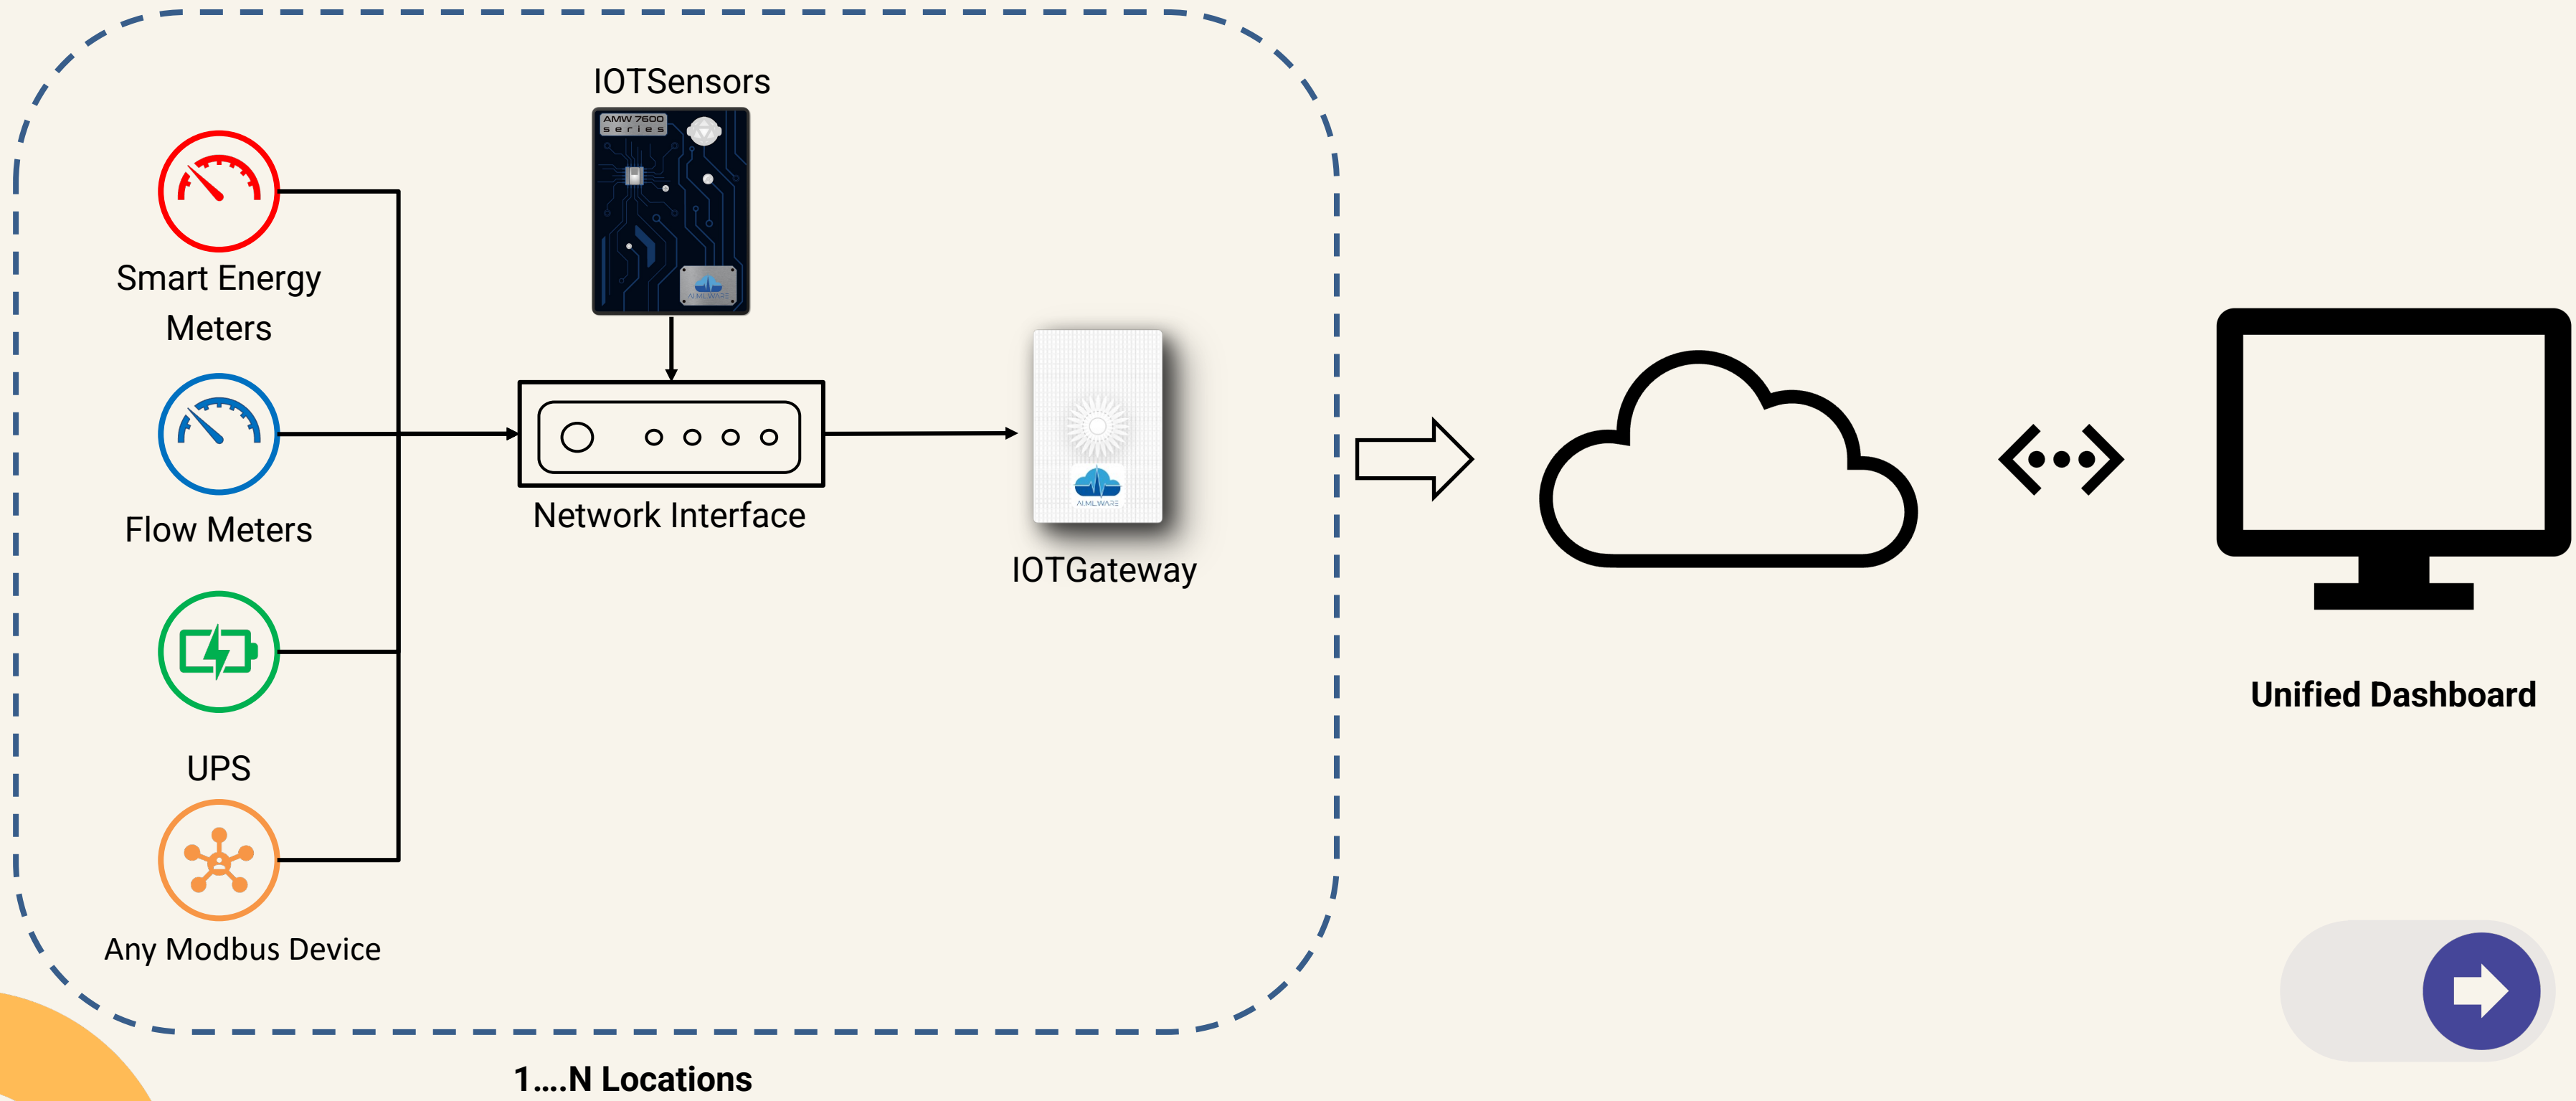

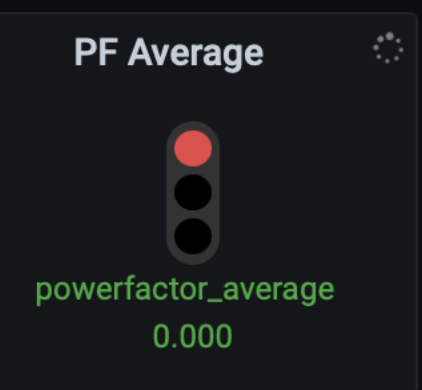

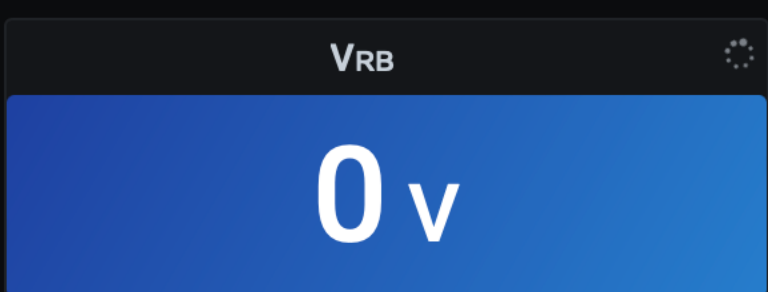

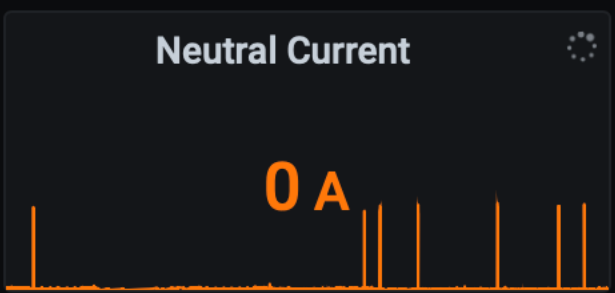

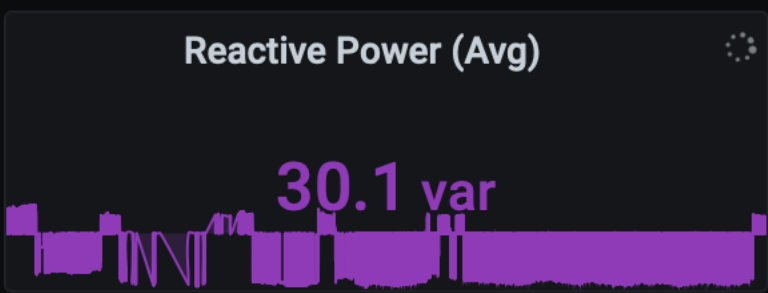

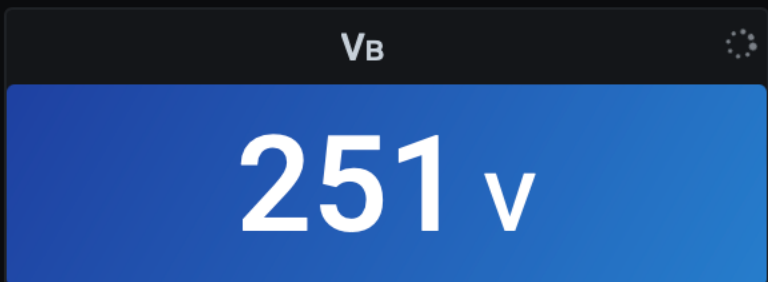

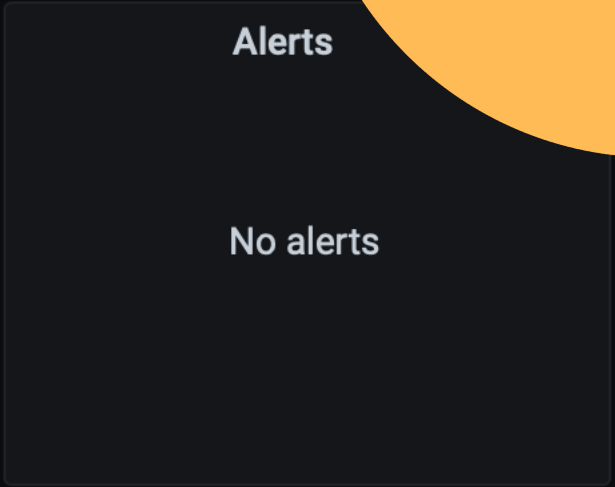

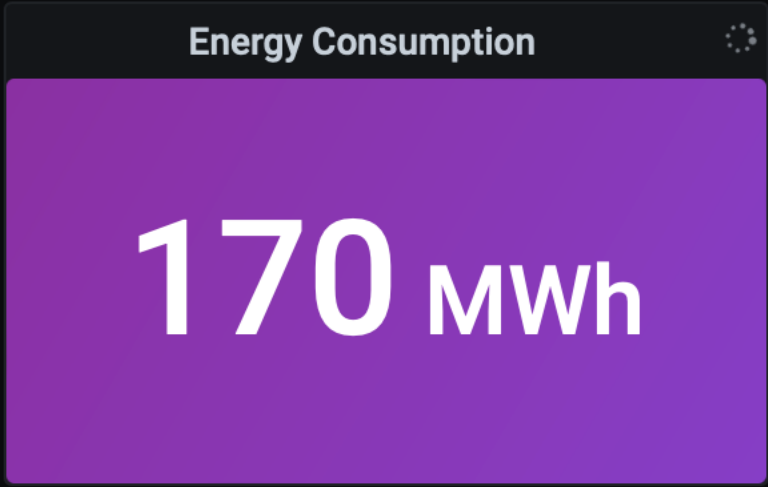

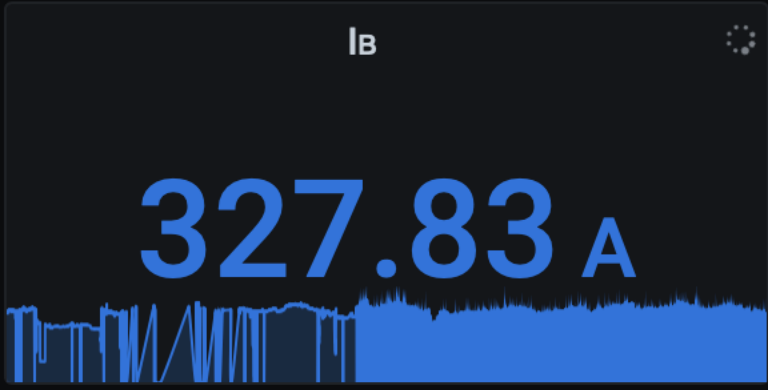

IOTSensors
AMW7600 Series

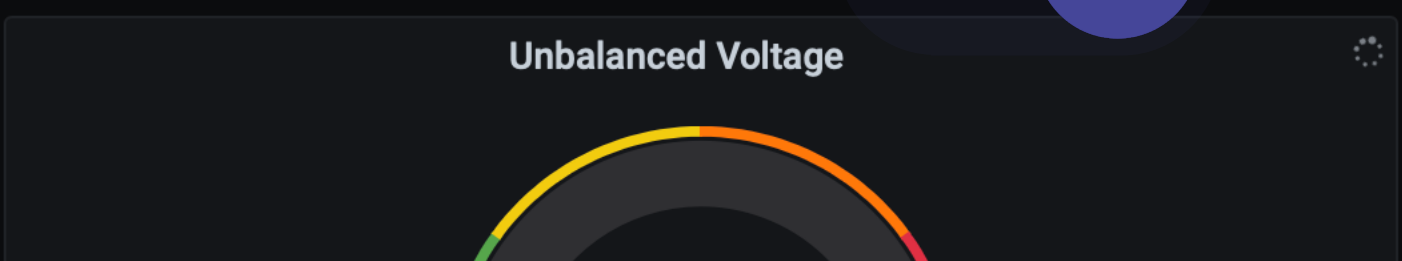

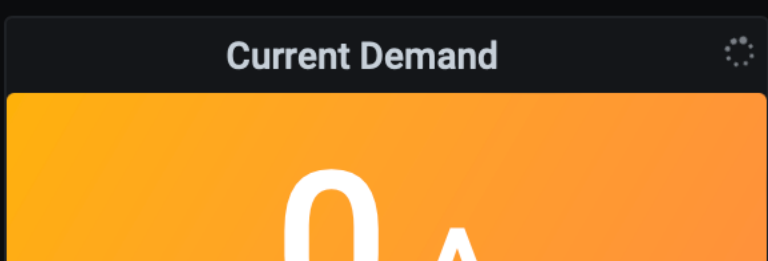

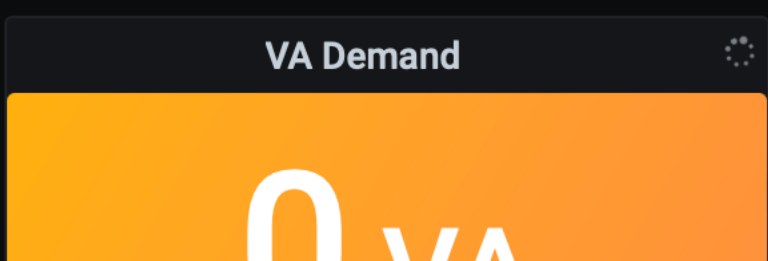

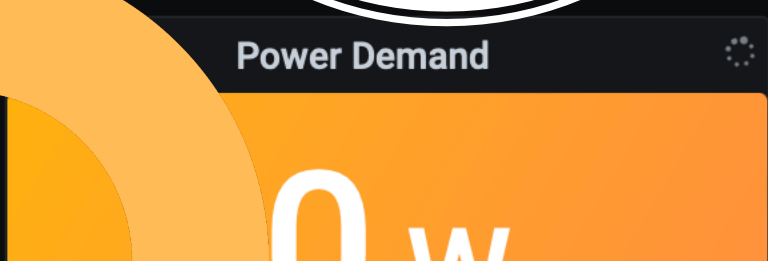

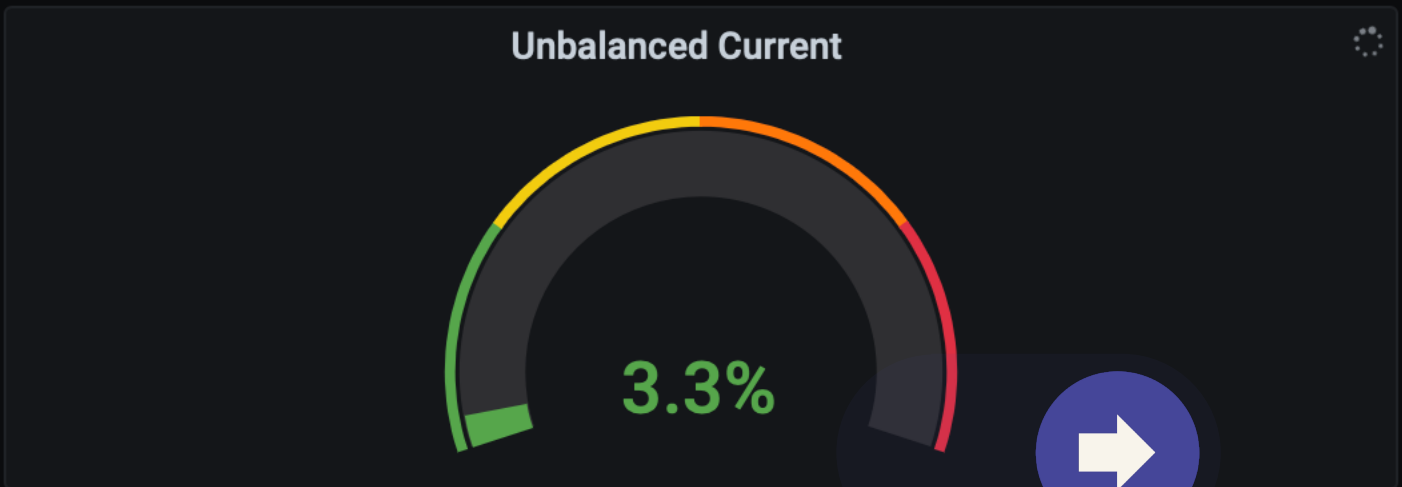

IOTGateway
AMW7500 Series

How everything works!

Know
Everything,
Anywhere,
Anytime!

The AIMLWare Advantage!

AI.ML.WARE

Others

Industry's Lowest Footprint BMS

Case Study: A leading specialty lubricants manufacturer

*With real time remote monitoring,
anomaly detection this customer
is able to prevent damages to
equipment worth crores of
rupees!*

Multi-Site Monitoring

Using our IOTGateway this customer was able to remotely monitor all 5 of their units from a single dashboard!

Process monitoring

With minimal effort we were able to interface the IOTGateway to also remotely monitor their manufacturing processes

Real Time Energy Audit

Over 60 existing energy meters were interfaced to IOTGateway to provide real time energy audit data with real time alerts!

AI-Enabled Physical Monitoring

IOTSensors were deployed to perform thermal mapping of critical sections of the factory to detect and help prevent fire mishaps.

Case Study: Technological Transformations at grass root industries

*With real time remote monitoring,
anomaly detection this factory is
able to identify its operational
efficiency!*

Remote Monitoring and Alerting

Using our IOTGateway this customer was able to remotely monitor all aspects of their operations!

With our cloud enabled Unified dashboard, this customer can now receive alerts on their mobiles.

Real Time Operational Efficiency Audit

All process parameters were interfaced to IOTGateway to provide real time analytics data.

- > Input material monitoring
- > Output material quantity monitoring
- > Operational energy monitoring

THANK YOU!
