

aiOla

THE AI INSPECTION LOOP

aiOla's AI Inspection Loop sits on top of **existing critical processes**, producing instant quantifiable value & ROI, allowing your team to **do more with less by impacting efficiency, safety, and minimizing waste, in any language, accent, or industrial jargon.**

30%

Reduced **Inspection** time

75%

Reduced "**Paperwork**" time

>25%

Increased **Production** time

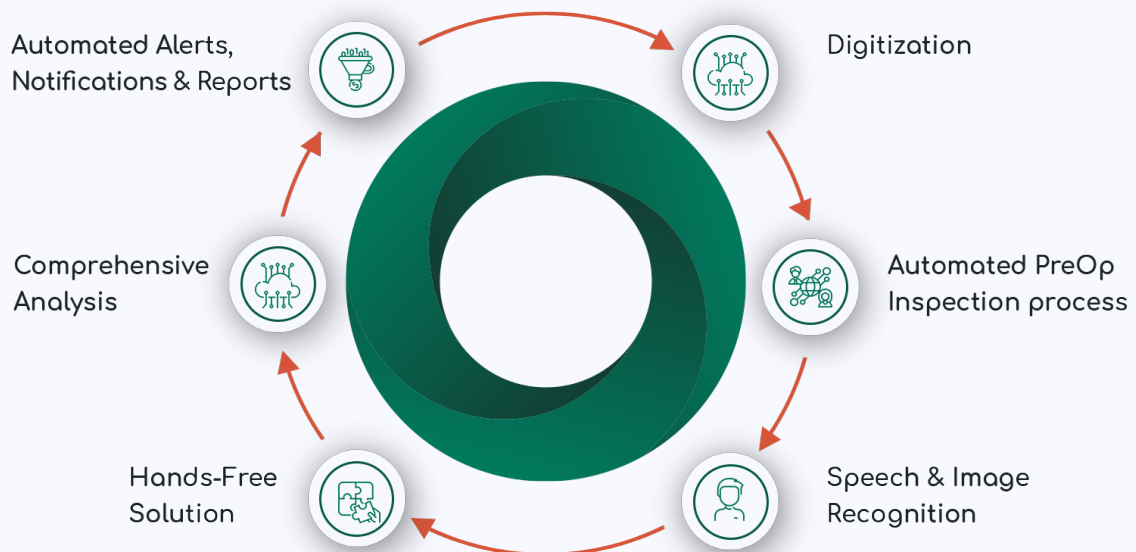

Hands-free Inspection. aiOla's unique ability to collect unstructured data by voice, helps improve our NLU models, generating significant value by decreasing inspection time and increasing production uptime.

Knowledge Gathering. The Inspection Loop Application collects data, turning it into super-rich material allowing the aiOla platform to detect trends before they form.

Digitize and Automate. Collect and automate the Inspection process with auto-scoring capabilities, pre-populated default values, quickly assess defects and corrective actions, and sort and search options.

Real-time Collaboration. With aiOla's easy to use interface, Inspectors, Sanitizers, Engineers and Supervisors can collaborate real-time with one source of truth.

THE SOLUTION

Enjoy the power of hands-free, state-of-the-art voice and image recognition combined with advanced AI models to digitize, automate and streamline inspection processes; dramatically reduce operational costs, increase production time, automate trend reporting & minimize downtime.
