

LexQuill

Azure Marketplace · Legal AI Platform

Faster drafting. More precision. Complete control.

The only drafting partner you will ever need.

LexQuill is a zero-friction AI legal drafting platform for counsel who demand speed and rigor. AI handles clause generation, compliance checks, and redlining — so lawyers focus entirely on strategy. Every decision stays with the professional.

CAPABILITIES

Redlining & Track Changes

Every edit is visually marked. Accept or reject changes individually with full transparency.

Version Control

Save versions on demand with a single click. Mark trusted safe points and restore any prior draft instantly.

Integrated Paraphrasing

Hover any clause for instant AI rewrites. Choose from multiple options without leaving the document.

Smart Document Review

AI scans for missing clauses, risky language, and formatting gaps — sorted into Necessary, Recommended, and Optional.

Strength Meter

Clause-level robustness analysis. Surfaces enforceability gaps and unsafe language before the document leaves your desk.

Bias Assessment

For agreements and contracts: clauses benchmarked against market standards & client instructions. Biased terms labelled with instant rewrites.

Fact-Grounded Drafting

Upload supporting documents or case briefs. LexQuill generates context-specific drafts grounded in your materials.

Template Library & Upload

Start from professionally drafted templates or upload firm-approved formats with locked clauses and mandatory provisions.

AI Chatbot — Query Your Draft

Ask the AI questions about your draft — query clauses, request explanations, or seek clarifications instantly.

HOW IT WORKS

01

Select document type. Upload a template or supporting materials if available.

02

Provide your prompt. LexQuill generates a structured, fact-grounded first draft instantly.

03

Review with Smart Review & Strength Meter. Query via AI chatbot. Save versions manually.

04

Apply redlines, accept changes, and export in Word or PDF when finalised.

MADE FOR

Law Firms

- Accelerate matter output, maintain firm-wide drafting standards, and free senior counsel from routine revision cycles.
- Protect profit margins by shifting toward value-based pricing through drastic reductions in manual drafting hours.

In-House Counsel

- Draft agreements faster with built-in compliance checks — without relying on external counsel for every revision.
- Enable business units to self-serve low-risk contracts using pre-approved guardrails to eliminate legal bottlenecks.
- Maintain a transparent, audit-ready version history for every clause deviation to simplify corporate governance.

Solo Practitioners

- Professional-grade drafts from day one. No team required. Full control over every version and clause.
- Scale practice capacity by using automated document assembly to compete for complex matters typically reserved for larger firms.

Legal Departments

- Standardise contract workflows across jurisdictions, reduce turnaround times, and enforce internal template policies.
- Scale practice capacity by using automated document assembly to compete for complex matters typically reserved for larger firms.
