LexPreceda

AZURE MARKETPLACE · LEGAL RESEARCH AI PLATFORM

Faster research. Deeper precedent. Complete confidence.

AI ORDINATE
AI's Perfect Coordinate

The only precedent research you will ever need.

LexPreceda is an AI-powered precedent intelligence platform for legal professionals who need accurate, explainable case law research - fast. Natural-language search, contextual relevance ranking, and verified source attribution replace Boolean strings and manual citation-chasing, so lawyers spend less time searching and more time arguing.

CAPABILITIES

Smart Search Search in plain legal language, facts, statutes, or uploaded documents — no Boolean operators required.	**Relevance Based Ranking** Ranks judgments by factual, statutory, and semantic alignment — not just keyword frequency.	**Jurisdiction & Research Filters** Narrow results instantly by jurisdiction, court, bench, and year, layered on AI ranking.
Structured Case Briefs Every judgment distilled into an IRAC brief with relevant excerpts and referred authorities.	**Verified Source Attribution & Relevancy Score** Every insight links back to the source paragraph, with a transparent relevancy score.	**Precedent Vault** Save, summarise, and organise research into a personal, reusable case repository.
Document Based Legal Search Upload any legal document to auto-extract context and retrieve relevant case law.	**Automated Case Law Mapping** Visualise how a precedent has been followed, distinguished, or overruled over time.	**Live Document Querying** Ask natural-language questions about an uploaded document and get source-grounded answers.
Focused Extraction Surfaces the most relevant paragraphs of a lengthy judgment or document first.	**Precedent Comparison Tool** Compare judgments against a primary case with colour-coded consistency analysis.	**Legal Argument Extractor** Automatically separates and organises each party's arguments within a judgment.
Lifecycle Tracker Tracks a matter's procedural journey — appeals, revisions, and connected proceedings.	**Cross-Jurisdictional Case Mapper** Compares precedent, reasoning, and outcomes for similar issues across jurisdictions.	**Custom Citation Formatter** Generates and copies citations in multiple recognised formats with one click.
Inline Legal Glossary Instant, contextual definitions for legal terms, doctrines, and Latin maxims.	**Ratio Identification Engine** Isolates the binding ratio decidendi, validated using the Wambaugh and Goodhart tests.	**AI Legal Intelligence** Flags contrary authorities and explains why a precedent is relevant — or risky.

HOW IT WORKS

01
Enter your query — natural language, facts, statute, case name, or an uploaded legal document.

02
AI interprets legal intent and retrieves precedents ranked by contextual relevance.

03
Review IRAC case briefs, relevant excerpts, relevancy scores, and case law maps.

04
Save to your Vault, compare against a primary judgment, and export citations instantly.

MADE FOR

Law Firms
- Accelerate matter turnaround with AI-ranked research across every practice group.
- Build a firm-wide Vault of verified precedent for consistent citation standards.

In-House Counsel
- Get fast, defensible answers on precedent without waiting on outside counsel.
- Track how key judgments are treated over time via Case Law Mapping.

Litigators & Advocates
- Strengthen arguments with the Comparison Tool and Ratio Identification Engine.
- Anticipate opposing authorities via AI Legal Intelligence's contrary-precedent detection.

Academic & Research
- Explore doctrinal evolution through citation networks and chronological maps.
- Learn faster with the Inline Legal Glossary and structured IRAC briefs.
