COPILOT DEPOLOYMENT

Deploy Copilot for Microsoft 365 with real confidence!

Copilot for Microsoft 365 is a highly effective business tool that will become your goto assistant for improving work efficiency across your team. Using Microsoft's generative AI technology, Copilot connects to your business data supporting users to work faster, better and smarter, enabling significant time and cost savings to be made across a variety of tasks. As well as acting as your personal assistant to task management, it will also support your team to deliver faster more accurate results across your business workflows by integrating seamlessly with popular Microsoft 365 applications such as Word, Excel, PowerPoint, Outlook, Teams, and more.
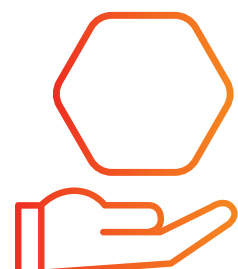

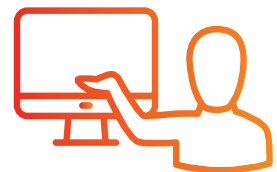

To unlock the capabilities of Copilot for Microsoft 365 within your organisation, it is critical that it is deployed in a secure and compliant manner which is crucial in maximising productivity and minimising the potential for confidential data exposure within your business. By implementing the recommendations from our **Copilot for Microsoft 365 Readiness Assessment** *(available separately)* you can be sure that your data, licenses, applications and users are positioned to gain the maximum benefit from Copilot for Microsoft 365 from day one.

Improve the productivity of **70%** of your users[1]

Simplify Copilot for Microsoft 365 deployment

In order to implement Copilot for Microsoft 365 there are a number of pre-requisites your IT environment must meet, our Copilot for Microsoft 365 Readiness Assessment will help identify how prepared your business is for Copilot for Microsoft 365 and provide a report highlighting the mandatory and recommended actions you should take prior to deploying Copilot for Microsoft 365.

Implementing some of the requirements and recommendations can be complex and, if not carried out carefully, can cause disruption to your business. Our Copilot Deployment service takes the recommendations from our Copilot for Microsoft 365 Readiness Assessment and works with you to develop an implementation plan, and once your environment is ready, it will support you with the rollout of Copilot for Microsoft 365 to your users.
