

Airnet Azure Foundations™

Microsoft Partner

Gold Cloud Platform
Cloud Solution Provider

- 1 On-prem or standalone domain of the tenant. Foundations will create an integrated hybrid environment.
- 2 Enterprise Enrollment is for MAC is established. The Enterprise Administrator delegates to Departments.
- 3 Departments act as containers for Accounts and are used to designate financial and security barriers. Departments are optional but strongly recommended.
- 4 Two Accounts capture the patterns of Managed and Sandbox. Account Administrators control deployment and administration of subscriptions.
- 5 Managed Accounts in each Department are allocated /17 address space. This address space is carved into standard subnets for each subscription.
- 6 Default subscriptions compartmentalize workloads based on security, secure development, and lifecycle management.
- 7 Each region is allocated /18* with VPNs between subscriptions to enable Georedundancy Capabilities for managed workloads.

A Turnkey Azure Deployment: *Simple, Easy, Fast!*

- Pre-architected framework
- Removes guesswork
- No complicated, expensive planning steps
- Set up & configure in one meeting!

We Can Serve You - with 20 Servers or 20,000!

With more than 15 years of data center management and IT infrastructure deployment experience, Airnet is uniquely qualified to perform your cloud assessments and migrations. Contact us today for more information about how Airnet Azure Foundations can work for you.

WHAT YOU NEED TO KNOW

- Streamlines planning and deployment of Azure resources in a standardized, scripted way.
- Incorporates redundant Azure regions, including security-hardened production, high business impact, pre-production, production, storage, and more.
- Provides a secure, flexible Azure environment that is already deployed and organized for you.
- Significantly reduces the amount of initial work and investment required to get Azure VMs up and running.

HOW TO GET STARTED

Airnet Azure Foundations is deployed in one meeting by answering only three pre-planning questions:

1. What Azure Regions do you want to use?
2. What three letter Azure naming designation do you use?
3. What IP range is needed? (A/16 is deployed by default)

Airnet Azure Foundations can be tailored to fit specific customer requirements. It works best when combined with the Airnet Systems Assessment Tool (ASAT). This tool provides detailed inventory, performance, right-sizing, and cost data on your IT infrastructure.

WHAT DO YOU GET

1. **All required subscriptions**
 - Sandbox
 - Services
 - Dev-Test
 - Production
2. **Segmented infrastructure**
3. **Core network infrastructure**
 - Required virtual networks
 - Subnets defined by workload
 - Network security groups
 - Network gateways and VPN endpoints
4. **Resource groups**
