

Microsoft Low-Code / Power Apps: 1-day Envisioning Workshop

- A 1-day workshop using interactive design thinking concepts from Microsoft's Catalyst Framework.
 - It aims at defining current challenges and uncovering rapid solution prototyping possibilities for low-code based solutions with Microsoft Power Apps and the wider Power Platform.
 - The workshop is designed to help businesses get started with the Power Platform. If your organization is new to Power Apps or needs help envisioning relevant use cases, this workshop provides a great foundation for success.
- The workshop contents
 - Review of your business objectives
 - Discovery and visualization of potential low-code solutions
- The workshop deliverables are a collection of new ideas and a roadmap of next actions.
- Business Benefits of Envisioning Workshop
 - Identify priority applications for your organization from workshop learnings
 - Learn how to apply the Power Platform to priority relevant business needs
 - Quickly ramp up the organizational knowledge of the capabilities of the Power Platform
- The intended workshop audience is Business Decision Makers, and the workshop is delivered either at a physical location or virtually using digital collaboration tools.
