

Multi Agency Collaboration Engagement

Improving collaboration between organisations through the creation of a shared model for data and information.

The challenge

Organisations that work daily with multiple different departments and third parties such as public sector bodies and third sector organisations collect and manage a large amount of information. Making this data available to the right people can often be time consuming, disjointed and inefficient due to the use of multiple bespoke systems and processes, duplicate or missing information.

Core deliverables & outputs of the engagement

Ingentive will deliver a 30-day engagement in which we will build out a secure platform to enhance collaboration, automate processes and provide data driven insights to all relevant parties using core Microsoft technologies.

Teams

PowerApps form

Power Automate
workflow/s

Power BI

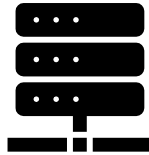

This platform will provide:

- Single, up to date repository of data for multiple agencies
- Trend analysis and reduction of manual process
- The ability to capture information quickly
- Search capability for individuals or data within the system to view and modify

Our approach

Data Capture
App Development

Data Platform
Modelling and Sharing

Data Capture Power
BI Reporting

Why Ingentive?

We are Microsoft's Global Diversity and Inclusion Changemaker Partner of the Year 2020, finalist at the Microsoft 20/20 Security Awards and finalist in Apps and Solutions for Microsoft Teams and Teamwork. Our strategy is to earn our customers' trust by focusing on business outcomes, good advice and best-in-class solutions to support the journey through digital transformation to a resilient digital business.
