What Is MoC LIS/RIS?

MoC LIS/RIS (Laboratory/Radiology) Information System is a state of the art laboratory automation and management software offered by Akhil Systems on Cloud (SaaS) model. MoC LIS/RIS is a boon for laboratories of all shapes & sizes. Safety and security of the cloud combined with the clinical effectiveness of the MoC LIS/RIS can optimize the workflow of labs increasing the productivity.

MoC LIS/RIS is a comprehensive software solution which can create a centralized-database to support multi-site facility setups. MoC LIS/RIS gives a communication channel for enhanced departmental coordination. A lab can extend the patient care services with the use of Mobility Solutions, patient portal and Home Collection facility. All latest lab machines (unidirectional/bidirectional) can be interfaced with the MoC LIS/RIS. SMS/Email events can be mapped too for extended patient care and effective patient experience.
