

Microsoft Dynamics, SharePoint and Power Platform Consultancy, Development and Support

About Akita

Akita Intelligent Solutions is the specialist business technologies and digital insight division of Akita Systems Limited.

With over 20 years of experience in digital success solutions, our consultants design, develop and support business intelligence and automation technologies for organisations across the UK.

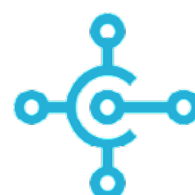

We empower organisations with the expertise, tools and insights needed to run smarter operations. These in turn deliver the cross-organisation improvements needed to take their operations to the next level, driving growth in the process.

For solutions for organisation or to discuss your digital transformation journey, please get in touch.

Solutions & Accreditations

We develop custom solutions that serve a range of organisational needs. These range from enhancing business intelligence to automating work processes to boost productivity. Common developments include:

- CRM Systems
- ERP Systems
- Marketing Solutions
- Finance Systems
- Intranets
- Document Management
- Extranets
- Project Management Tools
- Workplace Apps
- Customer Portals
- BI Reports
- Process Automation

Our consultants are highly-experienced solutions architects, experienced in both their specialist products and the needs of businesses. They are also trained in both project management and support.

Gold
Microsoft Partner

Akita is also a Microsoft Gold Partner; recognition of our expertise in the products we develop.

Locations

Akita operates across the UK. Our Kent HQ is the base of our development and the home of our support helpdesk.

Our London offices allow us to better engage with our customers located in the capital, while our Surrey office provides an additional convenient work base.

We also operate two data centres, located in Reading and Maidstone, that power select hosted services.

Our Culture

Akita works with organisations ranging from SMEs to member of the FTSE 250, spread across a variety of industries.

We work hard to remain at the cutting edge of both industry and technology developments, using this knowledge to be able to benefit our clients.

We take an experiential approach to services, implementing as many solutions as possible within our own work environment before providing them to our clients.

By choosing solutions from us, you can be sure it has already been tried and tested by the toughest of critics – ourselves.
