

# Managed Archive (ECM) on Azure

akquinet AG is an IT company based in Hamburg, Germany that distributes standard software (SAP, Microsoft) and individual software along with private and hybrid cloud solutions in our own certified data centers. As a partner to Microsoft we support our customers by operating their individual Environments.

With you we together design an ECM-Platform that fits your needs. Foundation for the target system are Azure Services united with our ECM Software and our deep knowledge about ECM Systems and how to connect these to other business applications. Together we build and operate a cost-efficient, audit-proof and managed archive on Azure for you.

Your managed archive on Azure is available from all over the world no matter if we are talking about clients or connected systems. You can connect through the internet, azure gateway or express route to your managed ECM. Furthermore, it benefits from high availability options, automatic cost-efficient scaling and audit-proof storage option.

Due to our high flexibility within the selection of archive software, there are no limitations in archive or enterprise content management functions. You can run high-available business processes workflows, start mass-archiving documents and connect e.g. ERP- or other Systems with ease, thanks to azure load balancing and scale sets.

In Microsoft Azure, we provide you a managed enterprise content management system based on your needs. We provide you the global scaling with no limitations for connected systems like ERP-Systems, CRM-Systems, Mail Services, Fileservers and many more.

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve. Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers. We embrace open source, drive innovation through collaboration, and contribute back to the community.

### OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

### TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups. With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
