

# We build cloud-native solutions

## ABOUT Alerant

We are the leading IT service provider in Hungary. The main aim of our work is to ensure that our team of professionals understand the business goals of our large enterprise clients and introduce them to the technologies they need to reach the next level in their development. We develop cloud-native software solutions and automate their lifecycles. We are happiest when our technological innovations create measurable value.

### SEE WHAT CUSTOMERS ARE SAYING:

*"Automation and standardisation means control, which is very valuable for a large company in the size of MOL. ..."*

Enterprise Architect, MOL Inc,

## WHAT WE OFFER

Our team's strength lies in our eagerness to learn new tools and technologies. We are most experienced in lightweight Java frameworks, container technologies, microservice architectures, CI/CD solutions, distributed integration platforms, API Gateway solutions, and software safety and public cloud solutions.

The integration of the Microsoft Azure technologies, the associated best practices and Alerant's 2 decades of enterprise IT experience can create significant value for our customers.

Our company has been an IT supplier for TOP 50 companies in Hungary for almost 20 years. Our many years of experience in integration technologies and cloud-native development in the field of enterprise IT have enabled us to understand the customer's needs and, using the Azure technologies and Microsoft best practices, to develop an enterprise-scale software development and release technology pipeline that meets the stated IT goals and the ultimate goal of reducing time-to-market.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
