

Windows 365 Cloud PC Implementation

Windows 365

A cloud-based service that automatically creates a new type of Windows virtual machine (Cloud PCs) for your end users. Each Cloud PC is assigned to an individual user and is their dedicated Windows device. Windows 365 provides the productivity, security, and collaboration benefits of Microsoft 365.

Cloud PC

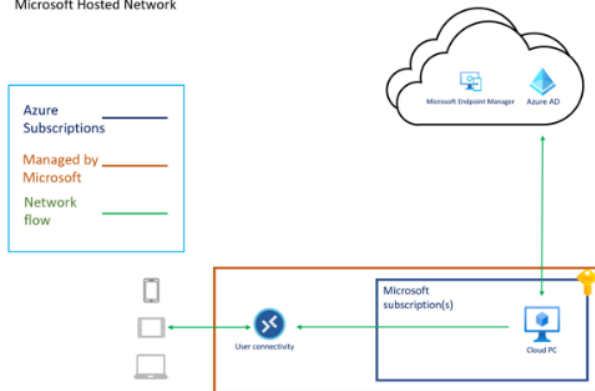

A highly available, optimized, and scalable virtual machine providing end users with a rich Windows desktop experience. It's hosted in the Windows 365 service and is accessible from anywhere, on any device.

What Are The Common Windows 365 Use Cases?

INTERNS AND TEMPORARY WORKERS

Instead of purchasing a physical device, they can use their own personal device and connect to your Windows 365 Cloud PC for work. You can even provide the employee with a small stipend for using their personal laptop. Employees like using their own equipment and keeping work separate from personal.

FRACTIONAL EMPLOYEES

Provide them with a Windows 365 Cloud PC. They can use whatever physical equipment they prefer, which is often already under management by their own firm. When they are on the clock for you, the Cloud PC provides them with a managed and secure PC already hooked into your environment.

OVERSEAS EMPLOYEES OR TEMPORARY OVERSEAS TRAVEL

Ensure your international employees are accessing company assets safely and efficiently by offering access to Windows 365 Cloud PC. Using their personal machines, they'll be delivered the same experience as your domestic workers – without risk to your business.

HIGH-SECURITY WORK

End-users with job requirements that demand a high level of security can confidently access apps, tools and other company resources regardless of location. Admins have the ability to control access to the most sensitive company assets by applying specific privileges and roles to unique users and groups.

SUPPLY CHAIN SHORTAGES

Cloud PC has been used to alleviate supply chain woes. New employees and those with the need for new hardware can use their personal device in tandem with Windows 365 Cloud PC to access company resources safely, without a disruption in productivity.
