

AI AND COPILOT WORKSHOP

# Exploring Efficiency and innovation: A deep dive into AI!

Unlock sustainable  
business optimization with  
Artificial Intelligence!

In an era where artificial intelligence transcends mere buzzwords to become an indispensable reality for forward-thinking companies, you face a pivotal question: How can you identify and harness the right AI strategy for your organization to drive genuine innovation? How can AI be leveraged to optimize and enhance the performance of your business model?

Our exclusive one-day workshop is your gateway to the world of effective business optimization through artificial intelligence. Dive in and explore the technology and gain insights into how you can utilize it to create tangible value, streamline processes, and foster enduring innovation.

We will illustrate why the question is no longer whether to implement AI in your organization, but how to do it effectively, enabling you to optimize existing processes and chart new territories. From capital efficiency gains to precise order and forecast optimization, and seamless process automation through process mining - we spotlight the concrete pathways through which Microsoft Dynamics, powered by the Power Platform, AI Builder, and Copilot, is paving the way to sustainable success and transformative innovation.

# Workshop stages:

Our methodology is designed to provide a structured and efficient approach to identifying, prioritizing, and implementing AI use cases tailored to your organization's unique needs. We combine strategic insights with practical execution, ensuring that every phase drives measurable results. Here are the five stages of the workshop:

## **Introduction to Microsoft's AI technologies:**

- Explore Microsoft AI and Copilot technologies. AI, productivity, and organizational efficiency.

## **Exploration of use cases:**

- Step-by-step of common AI use cases for idea generation. Identify opportunities to implement AI in your business scenarios.

## **Organizational readiness:**

- What to consider when assessing the benefits of AI implementation. What are the readiness factors to be considered.

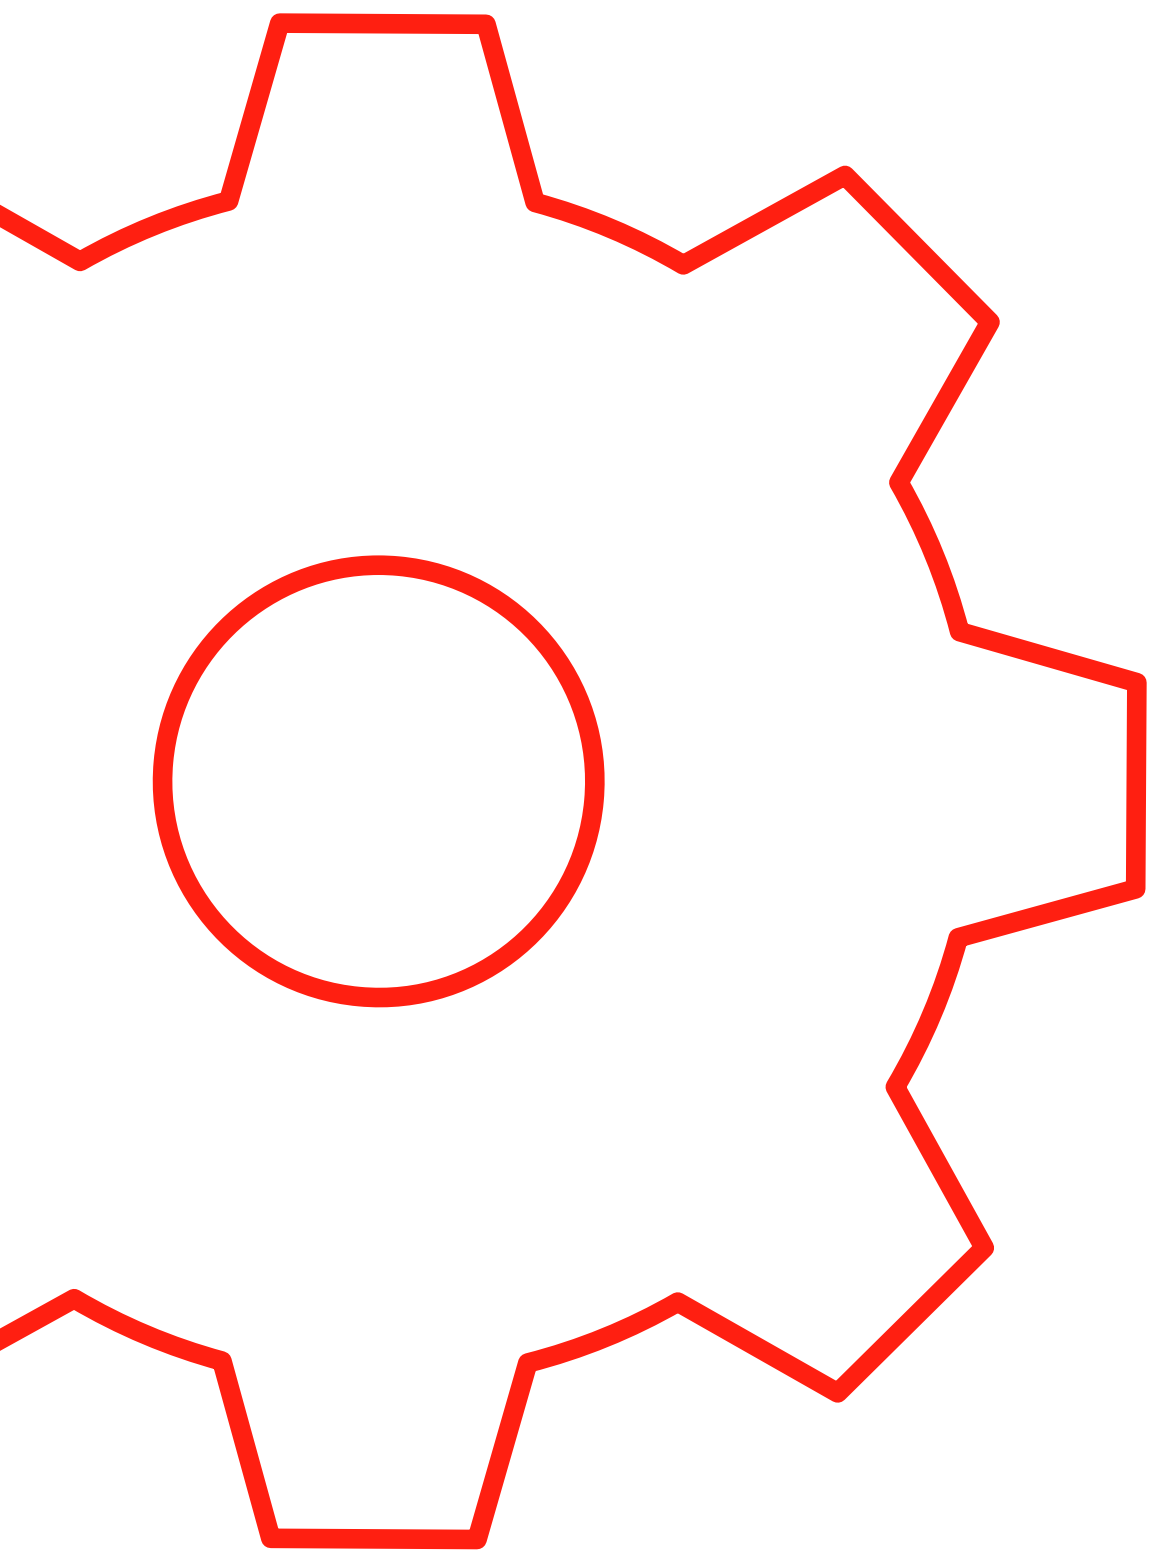

## **Prioritize use cases:**

- Discuss identified use cases and prioritize actions using Design Thinking tools.

## **Roadmap & next steps:**

- Summarize the roadmap for AI adoption. Discuss the steps to accelerate AI adoption.

# Tangible **benefits** for your company:

- 1.** Identification of tailored use cases.
- 2.** Crafting an AI integration strategy.
- 3.** Gaining insights into Microsoft's AI tools.

# Why choose this **workshop**?

Experience tailored solutions for Your business. Unlike conventional workshops, we provide personalized consulting to ensure the concepts presented seamlessly integrate into your business processes.

# Who should attend this **workshop**?

This workshop is designed for managers, IT decision-makers, process owners, and data analysts who seek to harness the full potential of artificial intelligence. If you aspire to elevate your company's efficiency and innovation to the next level, this workshop is tailored for you.

This isn't just another AI event; it's your roadmap to successful implementation and innovation. Discover how to conquer the challenges of the modern business landscape with the right AI tools and forge genuine competitive advantages.

Are you ready to actively shape your company's future? Secure your spot now and uncover the secrets of developing the ideal AI strategy for sustainable business optimization and innovation.

**Reserve your workshop now and enhance your company's competitiveness. Maximize your ROI through targeted artificial intelligence utilization!**
