Business Users Showtime!

Digital transformation has been empowering business users to take a leading role in innovation by utilizing simple and powerful tools to digitize processes.

Now they are citizen developers!

Challenge

How to increase business processes efficiency by automating, digitizing, integrating and monitoring them with an affordable budget?

Ideal Solution

A platform for building applications, process automation and analytics dashboards, with low / no-code and “drag and drop” capabilities;

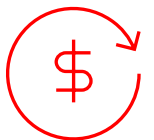

Integrated with all Microsoft product lines: Modern Workplace, Business Apps and Azure;

Allows business users to develop solutions by themselves.

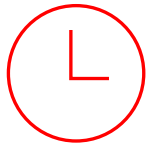

Desired Results

Support business teams with simple and powerful tools that enable them to build tailor-made solutions, with low risk, low cost, and quick implementation.

How to address these challenges?

Budget Restrictions

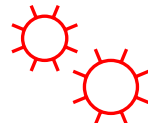

Time and Team Restrictions

Requirements Analysis

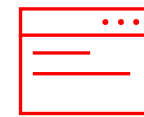

Manual Processes

Complex Processes

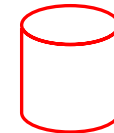

IT & Business Relationship

Legacy Systems Dependency

Governance for apps

Scalability and Maintenance

Security and Access control

Microsoft Power Platform

Platform for building applications, process automation and low / no-code bots

Integrated with all Microsoft product lines:

Modern Workplace / Office 365, Business Apps & Azure

Power BI

Business analytics

Power Apps

Dev apps

Power Automate

Automation

Power Virtual Agents

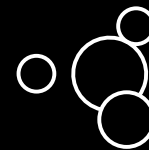

Smart Virtual Agents

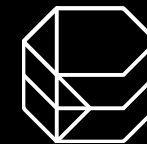

Connectors

Portals

AI Builder

**Common
Data Service**

Our Start&Go methodology makes the adoption of Power Platform simple and can include AI Builder and RPA capabilities. Our experts will train, provide insights and work together with your business and IT teams to:

- Identify, organize and prioritize initiatives;
- Build low-code apps that modernize processes and solve tough challenges!

Training

Speed up the training of your professionals on the Power Platform.

Digital Transformation Workshops

We help you with ideas and insights to address challenges and bring proposals for Power Platform-based solutions.

Quick Win

We work together on minimal viable products that we can launch with a reduced amount of effort and development.

AlfaPeople Start&Go Power Platform Training

Speed up the training of your professionals on the Power Platform, including an overview of AI Builder and RPA capabilities!

Power Platform Fundamentals (40h)

Introduction to Power Apps

What Power Apps are for, Application Types, Connectors and Where to use Power Apps.

Dataverse

What is Dataverse, Dataverse Management, Table Creation, Field Creation and Integration with Excel Plugin.

Power Apps Studio

Getting to know Power Apps Studio and Main objects and resources.

Building an application from scratch

Introduction to formulas, Tables and records, Data forms, Data form layout, Data cards, Variables, Previous and experimental features, Add and configure a control, Add a screen, Add a data connection, Show the list of items, Add a form, Show the current user, Add a list control, Add a graphic, Add multimedia, find accessibility problems, change the screen size and orientation, Save and publish an application, and Delete an application.

Devops

Working with app versioning, Solutions, Analytics Tool, Publish Application and Share Application.

Working with environments

What are Environments and Creating a new one.

Power Automate

What is Power Automate, Create Flows from triggers, Create Flow for Approvals and Create Flow for Push Notification.

AlfaPeople Start&Go Power Platform Quick Win

Implement one high-priority “Minimal Viable Product” (MVP) identified in the Digital Transformation Workshop.

We will develop together a small solution, containing only the main functionalities, ensuring that it works according to what was planned. From this sample, it is possible to test the solution efficiency in an operational environment, its users’ acceptance and usability, and its impact on the business.

Step 1: Choosing the Team

To achieve our goal with the MVP we will need to have the best team possible on the AlfaPeople side and on the client side.

Step 2: Understanding the Need

The Digital Transformation Workshop findings are the starting point for this activity.

Step 3: Planning Together

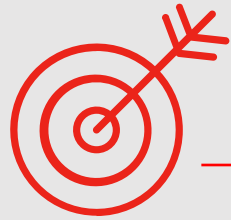

The main activities will be:

- Define together the objectives and purposes of the MVP based on the Power Platform;
- Detail the functionality that will be delivered and the technologies that will be used;
- Assign the correct professionals to the MVP initiatives.

Step 4: Building Together

The client’s team members that have been trained in the Power Platform will put their knowledge into practice by supporting the AlfaPeople team to build the planned solution.
