

# AlfaPeople Start&Go Power Platform

AlfaPeople is a leading Microsoft partner. Our Start&Go methodology makes the adoption of Power Platform simple and can include AI Builder and RPA capabilities. Our experts will train, provide insights and work together with your business and IT teams to:

- Identify, organize and prioritize initiatives;
- Build low-code apps that modernize processes and solve tough challenges!

## WHAT WE OFFER

### Training Sessions

Speed up the training of your professionals on the Power Platform!

Power Platform Fundamentals (40h), including an overview of AI Builder and RPA.

### Digital Transformation Workshops

Define proposals for Power Platform-based solutions to address your business challenges and definition of priorities.

This is an activity-based, hands-on workshop led by AlfaPeople professionals. The activities will be divided into five sessions.

### Quick Win

Implement one high-priority Minimal Viable Product (MVP) identified in the Digital Transformation Workshop.

## What is Power Platform?

Microsoft Power Platform is a suite of tools that allows anyone to develop applications, portals, chatbots and automate business processes with little to no code. In addition, Power Platform allows users to incorporate AI and sophisticated analytics into apps and workflow processes without having to be a data scientist.

It makes it very easy to integrate with Microsoft services like Office 365, Dynamics 365 and Azure as well as hundreds of third-party cloud services like SAP, Salesforce and Freshbooks to name a few. Microsoft Power Platform is the equalizer that allows a much greater portion of the population to participate in the digital transformation revolution.

## Power Platform Consists of 4 Parts:

### Power BI

A Business Intelligence Solution that makes it easy for everyone to make decisions based on insight and real-time data.

### Power Apps

Makes it easy to develop your own apps without having to code yourself.

### Power Automate

Increases business productivity by automating processes, typically repetitive tasks and paper trails.

### Power Virtual Agents

Build your own chatbot without code so you can participate in virtual collaborations with customers and employees, based on data and insights taken from other systems.
