

SAP on Azure

The Cloud-Ready Trust Path for Innovation: Delivering Azure Intelligence, Security, and Reliability to SAP Applications Continuous innovation and information

Leverage more than 100 Azure services, access the SAP Cloud Platform, apply smart analytics, and integrate your solutions with Microsoft 365, Teams, Power Apps, and Power BI to discover information that drives new experiences for customers.

Azure is certified to run critical SAP applications and delivers the scale, business continuity, and performance you already trust.

Unmatched safety and regulatory compliance

Our smart security services are backed by 3,500 cybersecurity professionals and the industry's broadest portfolio of compliance for SAP workloads in the cloud and on-premises.

An association you can trust

After decades of working together, Microsoft and SAP have announced a preferred cloud collaboration relationship to simplify and accelerate the transformation of customers in the cloud.

SAP and Azure, better together

The Embrace Preferred Collaboration Project between SAP and Microsoft, along with a global network of system integrators, offers a clear path to innovation in the cloud. This joint initiative helps our clients streamline the migration of SAP ERP and SAP S / 4HANA workloads from the local environment to Azure.

Infrastructure for all your SAP workload needs Combine SAP

Enterprise resource planning (ERP) cloud solutions with Azure innovation, agility, and reliability. Integrated backup and recovery simplify your SAP environment. Get systems up and running in minutes with up to 24TB of RAM for vertical scalability and 60TB for horizontal scalability for SAP HANA on Azure. High-performance virtual machines, specifically designed full rebuild instances, and massively scalable cloud storage help you make the most of your SAP investments.

Infrastructure for all your SAP workload needs Combine SAP

- ✓ Enterprise resource planning (ERP) cloud solutions with Azure innovation, agility, and reliability.
- ✓ Integrated backup and recovery simplify your SAP environment.
- ✓ Get systems up and running in minutes with up to 24TB of RAM for vertical scalability and 60TB for horizontal
- ✓ Scalability for SAP HANA on Azure.
- ✓ High-performance virtual machines,
- ✓ Specifically designed full rebuild instances, and massively Scalable cloud
- ✓ Storage help you make the most of your SAP investments.
