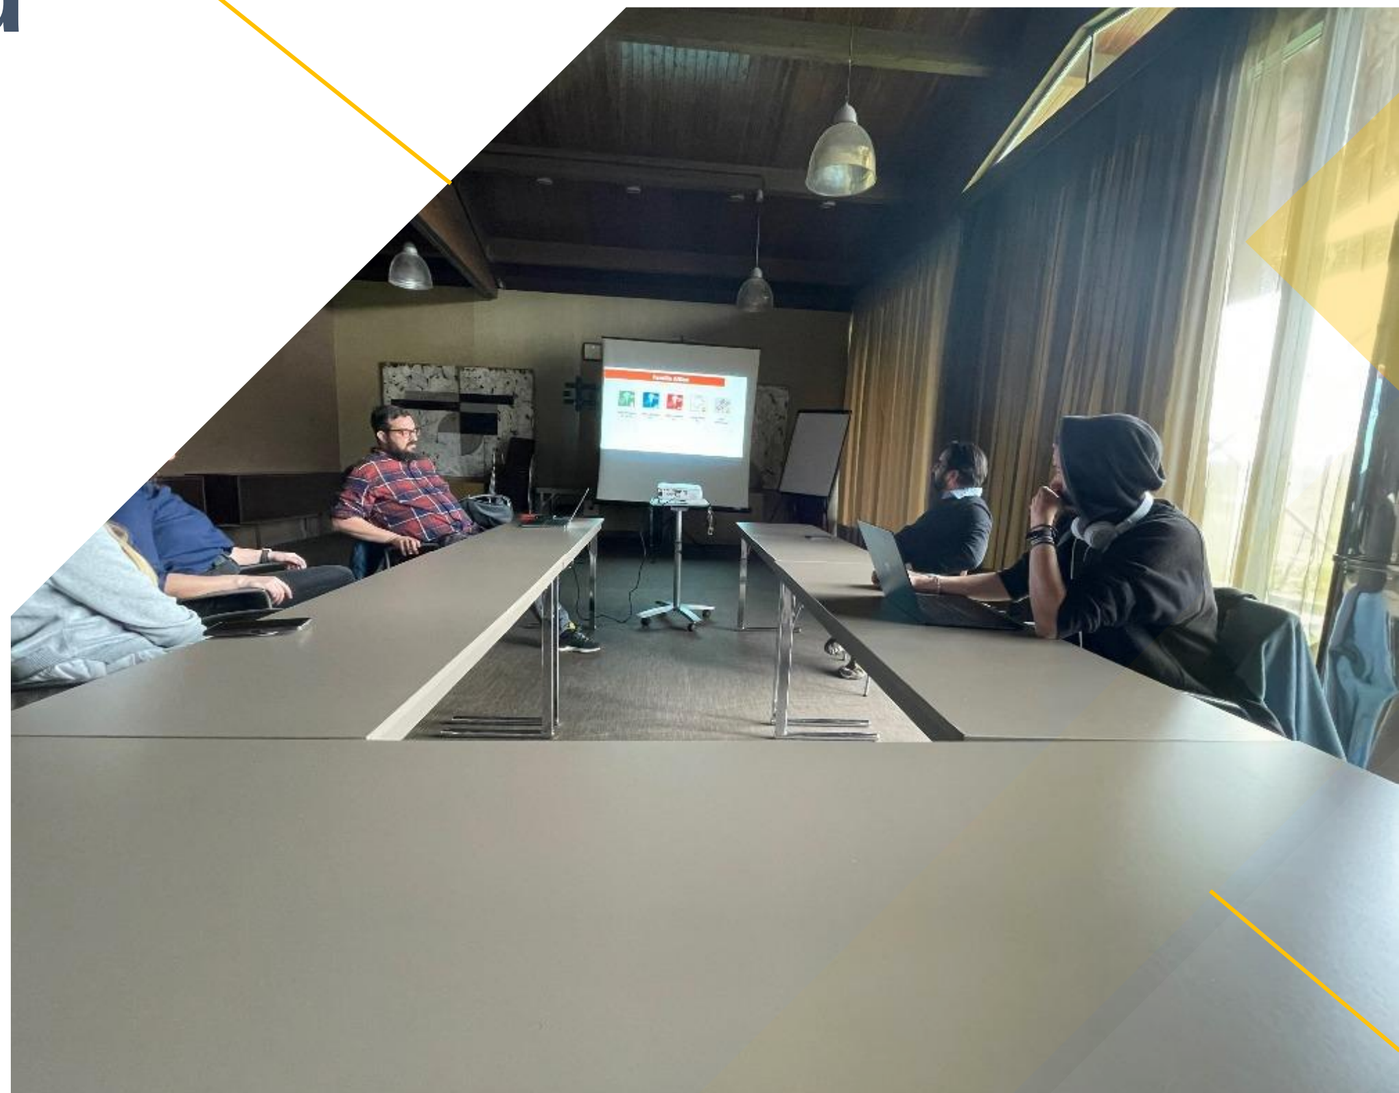
Modern Work

365 Modern Cloud Collaboration

Increase productivity with the right tools, resources and information.



How we can do better, more secure work in the cloud?

Difficulty adopting successfully Microsoft Teams, SharePoint and OneDrive. Businesses require a base model that enables a quick and easy way on how to manage and govern Microsoft 365 collaboration solutions.

Primary challenges

Employees have challenges working on remote with internal and external teams? How do you work across devices, locations, and regions? Using multiple tools for business communication, collaboration, and security?

Ideal solution

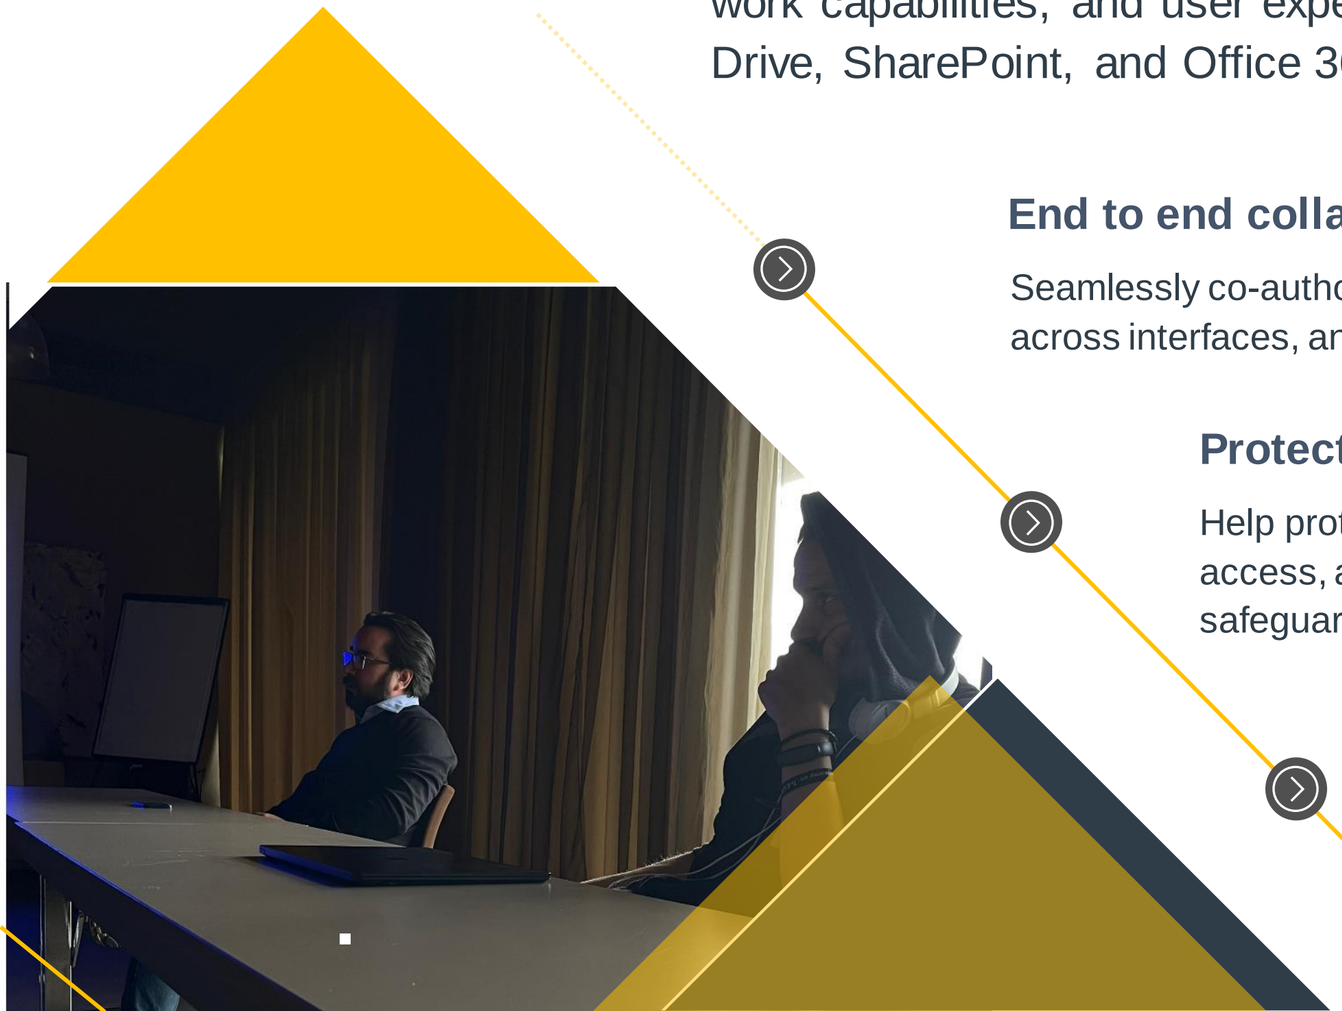
Guidelines for access to your information, compliance guidelines for security and privacy of your collaboration solutions, and to define roles and responsabilities for the management and provisioning of your data.

Desired outcomes

Digitize business process. Empower workers with the right tools, resources, and information. Customized digital workspaces. Rigorous data policy compliance. Business Agility & Productivity.

365 Modern Cloud Collaboration

We'll help you plan for functionality, environment security, business features, work capabilities, and user experience to successfully implement Teams, One Drive, SharePoint, and Office 365.



End to end collaboration

Seamlessly co-author documents in real-time, work across interfaces, and keep persistent discussions.

Protect your business information

Help protect data against malware, unauthorized access, and accidental deletion using built-in safeguards

Data & Information policy compliance

Ensure employees comply with all internal and external compliance requirements. Securely manage employees

365 Modern Cloud Collaboration

We'll help you plan for functionality, environment security, business features, work capabilities, and user experience to successfully implement Teams, One Drive, SharePoint, and Office 365.
