Identify business priorities in collaboration and security

Inventory of the company's current digital assets and evaluation of its status

Identify key people and team involved in the adoption of the new platform

Financial considerations of the business

#### Plan de Digitalización

Plan aligned with business objectives to obtain the greatest value from the platform

Defining future IT capabilities and roadmap

Considerations for administration and change management identified

Project budget estimate

#### Implantación del Servicio

Quick start for secure collaboration with M365:

- Knowledge management, document exchange
- Secure file storage
- Collaboration and communication in Teams
- Business Process Automation

## Security in the Cloud Enhancements

### Start your safe journey to the Microsoft Cloud

#### Security First Steps

Remediation and configuration of Security recommendations in your Secure Score

Application and configuration of best practices in Security for Companies with Microsoft 365

#### Microsoft Defender Deployment

Pilot group to deploy Microsoft Endpoint Manager and Azure AD SSO

Evaluate results and compile improvements

Plan and schedule implementation to all devices and users

Configure environment and policies.

Monitor and measure the success of the deployment.

#### Microsoft Defender Post-Deployment

Review implementation success and make adjustments

Maintenance and support plan for Microsoft Endpoint Manager and Azure AD SSO

Develop a plan (roadmap) for future improvements and updates

## Customer Success: Handtmann

They have everything they need for the workspace in Microsoft Teams. They built a productive remote workforce. Now they have threat protection, manage their employees' identities and access, and their small IT team can manage security for the entire organization.

### ▶ One productivity center

They are more productive because they don't have to constantly switch between productivity apps.

### ▶ Better user experience

Now they have work applications in a single workspace, making communication and collaboration between teams easier.

### ▶ Security anywhere

Employees work from anywhere in the world while IT maintains tight control over basic security needs.
