Conclusion using AI 🚀 (BETA) :

Candidate's Focus Level:

👍 High

Candidate has a high level of focus
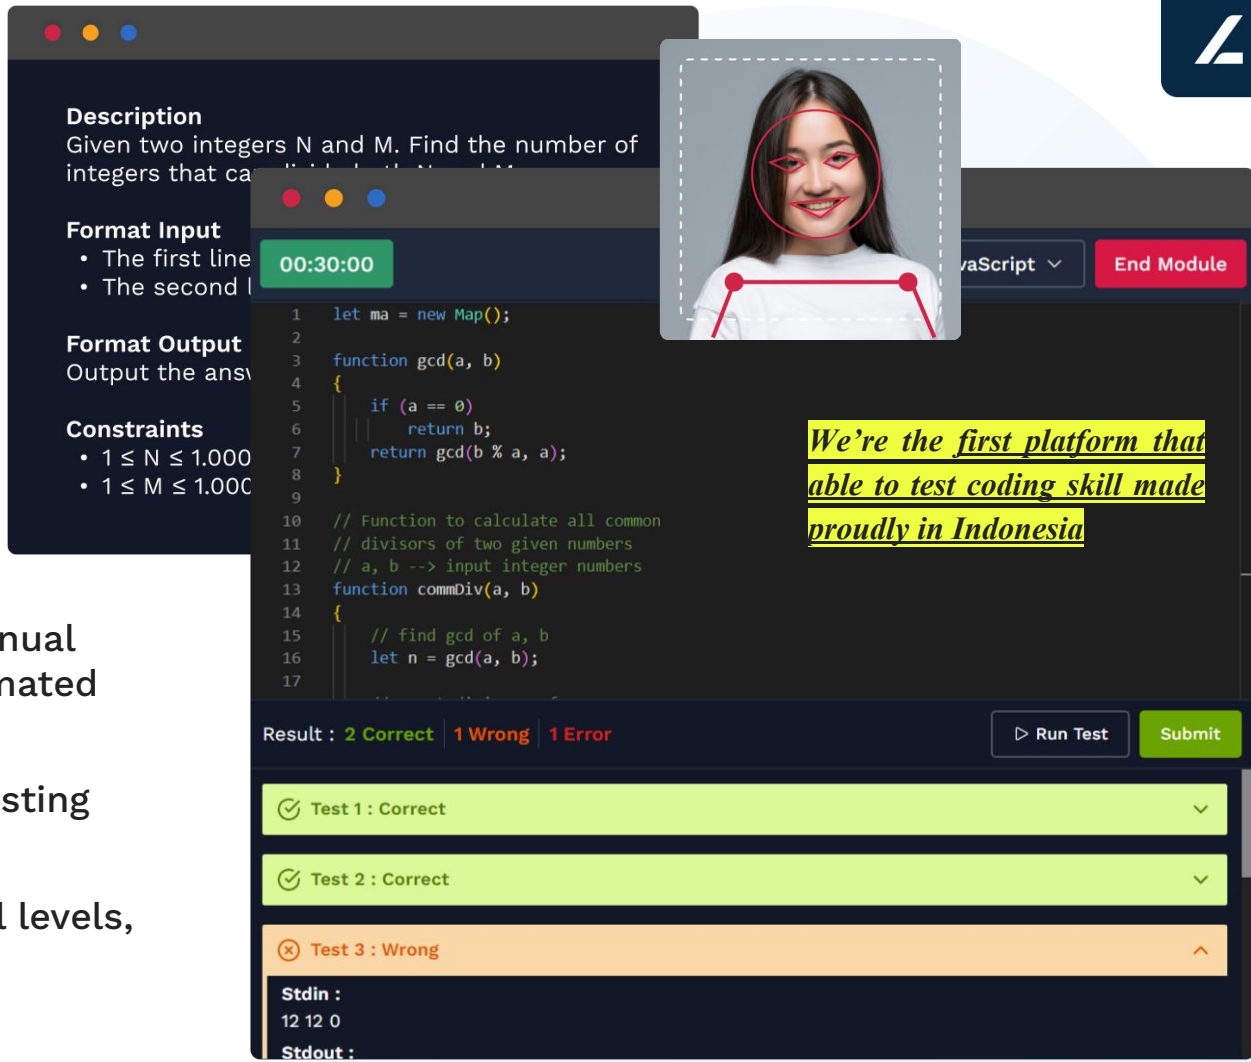

✅ **Collect and monitor test** *real-time*

✅ **Collaborative rating and review**

✅ **Comprehensive report(PDF & CSV)**

💻 **Test Tech Skills**

Actively hiring developers?

We offer various *coding test*

✅ Liberate your users from manual technical reviews with automated scoring system.

✅ Reliable and standardized testing environment.

✅ Suitable for developers at all levels, all roles and technologies.

Description
Given two integers N and M. Find the number of integers that can divide both N and M.

Format Input
- The first line
- The second l

Format Output
Output the ans

Constraints
- 1 ≤ N ≤ 1.000
- 1 ≤ M ≤ 1.000

00:30:00

JavaScript ⌄   **End Module**

```
1   let ma = new Map();
2
3   function gcd(a, b)
4   {
5       if (a == 0)
6           return b;
7       return gcd(b % a, a);
8   }
9
10  // Function to calculate all common
11  // divisors of two given numbers
12  // a, b --> input integer numbers
13  function commDiv(a, b)
14  {
15      // find gcd of a, b
16      let n = gcd(a, b);
17
```

We're the first platform that able to test coding skill made proudly in Indonesia
