# Collaborative Supply Chain Intelligence

Algo's digital transformation platform drives end-to-end, omni-channel supply chain performance. Our Sales & Operations Planning & Execution solutions enable our manufacturer, wholesale and retail clients to more accurately model, forecast and meet customer demand.

algo

End-to-end supply chain optimization.

A MODEL SUPPLY CHAIN

Insights Studio

Turn good supply chains into great supply chains using scenario plans that layer multiple forecast methodologies, price variables, seasonality, unforeseen disruptions, localization – if it can impact your supply chain, Algo can simulate it.
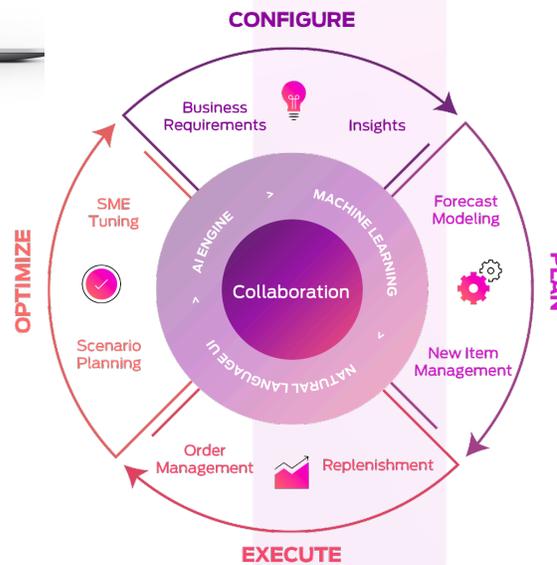

A MODEL SUPPLY CHAIN

Simulations Studio

Turn good supply chains into great supply chains using scenario plans that layer multiple forecast methodologies, price variables, seasonality, unforeseen disruptions, localization – if it can impact your supply chain, Algo can simulate it.

YOU, YOUR TEAM + ALGO

Collaboration Studio

Algo combines sophisticated analytics with world-leading communication platforms to deliver Collaborative Business Intelligence. Make insights actionable by engaging a colleague or seamlessly pulling a scrum into a strategy discussion.

Actionable supply chain insights that drive ROI.

Algo takes care of the heavy data-crunching, freeing you to focus on actions that will have the greatest business impact. We help you improve sell-through, right-size store inventory, and reduce returns driving efficiency through your entire supply chain.

We are data science experts that marry the power of advanced AI and deep Machine Learning with functional domain expertise, delivering solutions that help our clients operate more efficient supply chain operations.
